PART I.

1.—DEPARTMENTAL NOTES.

1. A prolonged illness compelled me to take privilege leave for three months from the 4th April. During my absence my Assistant Pandit Hīrānand was placed in charge of the office. After my return to duty on the 4th July I stayed at Simla till the 22nd October. In the course of the touring season I visited the following places :—Kasūr (1 day), and Delhī (16 days) in the Panjāb ; and Allāhābād (6 days), Fatehpur and Cawnpur Districts (4 days), Mathurā (28 days), Lucknow (16 days), Balrāmpur (1 day) and Sahēt-Mahēt (59 days) in the United Provinces. I was a week at Peshāwar on casual leave and spent the remaining 26 days at Head-quarters.

My Assistant visited Sunēt (Ludhiāna District), Kapālmochan (Ambāla District), Bohar (Rohtak District) and Delhī in the Panjāb, and in the United Provinces Mathurā, Rāi Bareli and Kosam (Allāhābād District).

2. The only special works of preservation undertaken in the Panjāb were those on some monuments in the Kāngra District which had been damaged in the earthquake of 4th April 1905. The most important work is that on the Baijnāth temple at Baijnāth which, by the end of the official year, was reported to be well in hand, whilst that on the smaller temple of Sidhnāth at the same place was nearing completion. The restoration of the Ambikeshwar temple at Haripur was completed at a cost of Rs. 504.

In the course of a three days' tour in the Fatehpur and Cawnpur Districts I inspected several brick temples including that of Bhitargāon. A report on my tour has been printed at the Government Press. While staying at Mathurā, I had an opportunity to visit Brindāban and the ancient temples found at that place. My notes on the Brindāban temples have been printed and circulated. The preservation of sculptures and minor antiquities will be treated in the section dealing with museums. A statement showing expenditure incurred on the conservation of Buddhist and Hindu monuments will be found on p. 7 of the present report. It will be seen that a sum of Rs. 12,638-3-1 was spent in the United Provinces and a sum

of Rs. 2,089-3-1 in the Panjāb. The former amount includes Rs. 9,947 for the construction of a museum at Sārnāth intended to contain all sculptures and other antiquities found on this important Buddhist site. The total sum originally sanctioned for this work is Rs. 35,000. The Executive Engineer, Benares Division, reports that the edifice has been done up to the plinth level. Among other important works carried out in the United Provinces, I may mention those for the protection of the Kālsī Aśoka rock inscription and for the preservation of the Dhamek *stūpa* at Sārnāth.

3. In view of the prevailing famine, I received instructions from the Government of the United Provinces to carry on excavations on the ancient site of Sahét-Mahét (Gonda and Bahraich Districts) instead of continuing my explorations at Kasiā (Gorakhpur District). The months of February and March were devoted to that work which, besides giving employment to more than 1500 men, resulted in the discovery of several inscriptions, sculptures of stone and terra-cotta and other antiquities. Among the finds is a copper-plate which establishes the identity of Sahét-Mahét with Śrāvastī. A special note on my explorations will be found in the second part of this report. The excavations carried on by Mr. Marshall at Sārnāth near Benares, I may also mention here as pertaining to my circle, though I was not personally associated with them. On a visit to Kosam, an ancient site in the Allahābād District which Cunningham has identified with Kausāmbi, Paṇḍit Hīrānanda obtained an interesting collection of terra-cottas and coins which will be made over to the Lucknow Museum. From the site of Sunét, Ludhiāna District Panjāb, he acquired a number of inscribed clay sealings and coins. Subsequently more antiquities from the same site were sent to my office by Mr. P. J. Fagan, I. C. S., Deputy Commissioner, Ludhiāna District. Detailed lists will be found in the second part of this report.

4. Important epigraphical discoveries have been made in the United Provinces. Besides the inscriptions found in the excavation at Sahét-Mahét and Sārnāth, I must record the acquisition of several inscribed sculptures of great interest at Mathurā (Muttra). One well-preserved inscription incised on a colossal Nāga image is dated in the year 40 and in the reign of Haviṣka. The discovery of two more copper-plate inscriptions was reported to my office. One found at Machhlishahr in the Jaunpur District, records a grant of land by Hariśchandra of Kanauj and the other discovered at Chandrāvati, Benares District is a title-deed of Chandradeva of Kanauj. For detailed information see the second part of this report. In the Panjāb no epigraphical discoveries have come to

my notice except a few in Chambā State which proves an inexhaustible mine of inscriptions. I am indebted to His Highness the Rājā of Chambā for a set of excellent estampages of the newly discovered inscriptions.

5. The year under review has been one of marked progress with regard to museums. The Delhī Municipal Museum, Museums, Panjāb. notorious for its neglected state, has been abolished, and a new museum established in the Naubat Khāna in the Fort. It is meant to contain exclusively objects of interest for local history, especially during the Mughal period. All such objects preserved in the old museum have been removed to the Naubat Khāna and several have been added since, including the Pālam well inscription presented by the Deputy Commissioner of Rohtak. All antiquities, not relating to Delhi, have been made over to the Lahore Museum. They include a collection of forty-five Gandhāra sculptures. One of these is the female figure found by Bhagwanlāl Indraji near the Saptarshi Tīlā at Mathurā (Muttra). The second part of this report contains a list of these and other antiquities acquired for the Lahore Museum. Finally I may record under this section that His Highness the Rājā of Chambā intends shortly to found a museum for the preservation of inscriptions and other antiquities belonging to the State.

6. As regards the archæological section of the Provincial Museum Provincial Museum, at Lucknow, we are still faced with the same difficulties— Lucknow. want of space and light—to which I have previously called attention (See my Annual Progress Reports for 1903-04 p. 33 ; 1904-05 p. 3 and 8 ; 1905-06 p. 3 and 1906-07 p. 3 and 5). Until these defects are removed, it will be impossible to make any material progress. The simplest and most satisfactory solution, in my opinion, will be to leave the Arts and Natural History sections in the present building and to provide a separate building for the archæological section which then could be placed in charge of an expert. The archæological collections, now housed in the ground-floor of the museum building, are practically lost to students, not to speak of recent acquisitions stored away in the *tahkhāna*. Hardly any of the sculptures have been photographed and many cannot even be properly examined on the spot. It is gratifying to record at the end of this section that the Managing Committee have resolved to entrust the cataloguing of the archæological section to Babu Rukhal Dās Banerji who, by his publications, has shown himself to be a thorough student of Indian antiquities, especially of the Indo-Scythian period to which the bulk of the sculptures in the Museum belong. A catalogue will go far to render the collection serviceable for educational purposes.

7. In the course of the year I have paid special attention to the Mathurā Museum founded by Mr. Growse as a depository of local art. A collection of Mathurā sculptures which were lying in the Public Library at Allahābād have, with the sanction of the Local Government, been returned to Mathurā and placed in the Municipal Museum. Besides, we succeeded in recovering for the Museum a number of valuable sculptures and inscriptions, including the Parkham image the inscribed Buddha of Anyor, the Mora well inscription (unfortunately much mutilated since its discovery by Cunningham), the *stāpa* drum of Dhruv Tīlā, the inscribed tablet of homage of the Holī Gate and several other pieces of unique interest. Here I wish to acknowledge the invaluable assistance rendered by Paṇḍit Rādhā Krishna of Mathurā in the acquisition of these antiquities. The Paṇḍit obtained, moreover, several important sculptures which had not yet been noticed by archaeologists. I sincerely hope that the great service he has rendered to antiquarian research will meet with due acknowledgment. In the course of a few months the number of sculptures has risen from 350 to 576 of which 57 bear inscriptions. I have much pleasure in recording here that Lieut.-Col. W. Vost, I.M.S., has consented to act as Honorary Curator of the Mathurā Museum and that Paṇḍit Rādhā Krishna will continue his labours in the capacity of Honorary Assistant Curator. The Municipal Board have appointed a Sub-Committee consisting of Paṇḍit Keshab Deo, Bābū Rām Nāth and Dr. Brij Lāl for the management of the Museum and have resolved to spend Rs. 700 on improvements proposed by me for the better exhibition of the sculptures.

8. My illness during the first quarter of the year has delayed several Publications. This applies in the first place to my volume on the inscriptions of Chambā State. This work is almost ready for the press, but a few epigraphs, some of which have recently been discovered, are still to be added. I am confident that a three months' stay in Chambā will enable me to finish the work. The 115 coloured drawings relating to the tile mosaics on the Lahore Fort have been completed in the course of the year and are now ready for publication. I wish to add to them an elevation of the Fort wall showing the position of each panel. Proposals will shortly be made to the Government regarding the best way of publishing these drawings which will form an interesting contribution to the study of Indo-Mughal art. A prolonged stay at Mathurā has enabled me to complete the catalogue of sculptures and inscriptions preserved in the Municipal Museum, but the recent acquisitions made by Paṇḍit Rādhā Krishna are still to be entered.

In co-operation with Mr. R. Froude Tucker, Archaeological Surveyor, and his Assistant, Maulvi Muhammad Shu'aib, I have undertaken to write a catalogue of the new museum in the Delhi Fort. We hope to bring out this publication before the beginning of next touring season.

9. No change has taken place in the personnel of my staff during the year under review. My Assistant, Pandit Hirānanda, was placed in charge of my current duties for the period of my absence on leave. He was granted three months' privilege leave from the 1st November 1907 till the 31st January 1908. During the remainder of the year he was deputed to inspect and report on several ancient sites and monuments, and discharged his duties with his usual diligence. The appointment of my clerk Bābu Munshī Rām was made permanent from the 1st November 1907. An increase of pay was sanctioned for my Head-draftsman and Photographer fixing a rate of Rs. 50 to 80 for each of them, and the monthly expenditure for servants was raised from Rs. 30 to Rs. 40. My two draftsmen prepared 47 drawings in the course of the year, including 14 relating to Sahét-Mahét. My photographer took 86 photographs of which 27 represent sculptures in the Mathurā Museum and 34 relate to Sahét-Mahét. He prepared, moreover, most of the estampages of the 98 inscriptions copied in 1907-08, a full list of which will be found on page 10—23 of the present report.

10. I intend to devote the first quarter of the current year to the completion of my epigraphical work in Chambā State. The second quarter will be spent at Simla in writing a detailed report on the Sahét-Mahét excavations and in completing the catalogues for the Delhi and Mathurā Museums. During the third quarter I wish to inspect ancient monuments and museums. In case my application for ten months' furlough combined with 1½ months' privilege leave is granted, I shall be away during the fourth quarter of the season. I do not know what arrangements will be made during my absence, but wish to make the following suggestions regarding the work to be done : If expert supervision can be obtained, it will be advisable to resume excavation at Sahét-Mahét. In the course of last year's explorations a great deal of preliminary work has been done, such as the clearing of spoiled earth, left on the site by previous explorers. The local labourers have become trained to the work, and it will be possible now to make good progress in clearing a larger area of the site. It will be advisable to restrict operations to Sahét where there exists a better chance of important finds than at Mahét. Notably the two Aśoka pillars described by the Chinese pilgrims are still to be discovered. Another important work to be done in the United Provinces

is a complete survey of the brick temples in the Cawnpur and Fatehpur Districts, especially that of Bhitargāon, which I inspected in December 1907. This is a task much more urgent than the excavation of Sabét-Mahét, as the temples in question are rapidly decaying, but it will be of little use, unless carried out under the superintendence of an expert in Indian architecture.

Statement showing Expenditure incurred on the conservation of ancient
Buddhist and Hindu monuments in my Circle during the year 1907-08.

Locality.	Description of work.	Amount spent.

3.—INSCRIPTIONS COPIED

Locality.	Inscribed object.	Dimensions.
CHAMBA		
1. Svāim (Himgiri <i>pargana</i>).	Stone image of Devī (3' 3" by 1' 10") placed in the village temple.	Two lines of 1' 9" and 5½" in length.
2. Mangloa (Loh Tikrī <i>pargana</i>).	Fountain slab (2' by 1') ...	Seven lines of 10", first two incomplete.
3. Siya Dudhār (Loh Tikrī <i>pargana</i>).	Fountain slab (3' 5" by 3' 3") broken in two pieces.	Seven lines; 11. I-6 of 8½" and I. 7 of 4½".
RAWALPINDI		
4. Rāwalpindī City ...	Stone slab (10" by 9½") found in bazar.	Nine lines 6½" long; lettering indistinct.
DELHĪ		
5. Delhi Museum (B.1).	Mihrab of a tomb from the village of Okhlā, demolished about 1880.	Height 10" 6½"; width 5' 4" ...
6. Do. (B.2).	Mihrab of an early Pathān mosque or tomb.	Height 3" 4½"; width 1' 7" ...
7. Do. (B.3).	Stone slab (ht. 1' 9"; width 3' 10") from the village of Pālam 12 m. S.-W. of Delhi City; recovered at Bohar (Rohtak District) and presented by Deputy Commissioner, Rohtak.	Twenty-two lines, 3' 8½" in length.
8. Do. (B.4).	Stone slab, (ht. 11"; width 1' 3½").	Seventeen lines of 14½" in length; central portion completely defaced.
9. Do. (B.5).	Stone slab (ht. 1' 1"; width 1' 6") from the village of Narāyana 7 miles south-west of Delhi City.	Twenty-one lines of 1' 5½" in length.
10. Do. (B.6).	Stone slab (ht. 11" width 1' 5") from the village of Sarban, 5 miles south of Delhi City.	Eighteen lines of 15"; the last line of 3".
11. Do. (C.16).	Circular stone stool (diameter 1' 1½") from Sambhal (Murādābād District U. P.)	Seven lines ...
12. Do. (C.17).	White marble slab (ht. 2' 7"; width 1' 7"), said to have been found near Nizām-ud-dīn.	Twenty-three lines ...

For estampages of Nos. 1—3 I am indebted to the courtesy of His Highness the Rājā of Chāmbā.

IN 1907-08.

PART II.

6.—PRESERVATION OF MONUMENTS.

In the beginning of December I spent three days in inspecting the ancient brick temples of the Cawnpur and Fatehpur Districts. As my report on the preservation of these buildings is in the press, it will suffice here briefly to note the main points.

Cunningham has remarked that in the Plains of India ornamental brickwork was once extensively used both in Brāhmanical and Buddhist monuments. Yet the subject has received hardly any attention in works dealing with Indian architecture. Even in Fergusson's standard work it has remained unnoticed.

This is no doubt largely due to the paucity of ancient brick buildings, their material being not only more fragile than stone but also more liable to be used in later structures. Large carved bricks of an early type have turned up on nearly every ancient site of Northern India, but the monuments in which we find them used are few in number and exhibit an advanced state of decay.

The only edifice built of ornamental bricks, which still retains its original shape, is the temple of Bhītargāon in the Cawnpur District. Cunningham in describing it has noted the main points of interest: the pre-Muhammadan arch and vault and the ornamentation of carved bricks and terra-cotta sculpture. He is of opinion that it cannot be later than the 7th or 8th Century, and probably is even older. There is reason to assume that it is indeed considerably older and goes back to the Gupta if not to the Kushana period. It should be observed that the carved brickwork, consisting of ornamental pilasters, alternating with terra-cotta panels and surmounted by a cornice, is very similar in style to that found in the early plinth of the Nirvāṇa temple at Kasiā which must belong to the Kushana or early Gupta period.

On my visit to Bhītargāon I found that since the days of Cunningham almost the entire porch of the temple had collapsed. A few years ago the Public Works Department carried out some repairs which consisted in covering the body of the building with a thick layer of plaster neatly finished off at the corners. It is hardly necessary to say that these repairs have wholly

spoiled the picturesque aspect of the temple, without adding in any degree to its stability. I have recommended that the modern plaster be carefully removed and the surface, wherever it is delapidated, be mended with the old bricks lying round the old building. It is essential that these repairs should be carried out under proper supervision and not left to a subordinate. The temple of Bhītargāon, as a unique specimen of early brick architecture, deserves to be completely surveyed; accurate drawings are required, and detailed photographs of its terra-cotta decoration.

The other brick temples in the Cawnpur and Fatehpur Districts differ in style from the Bhītargāon temple and must belong to a much later date. Mr. Growse, who restored some of the Fatehpur temples, assigns them to the Tenth Century. This estimate may be approximately correct. Unfortunately there is no epigraphical evidence except a short inscription on the lintel of a ruined temple which was discovered in 1906 by Mr. A. C. Walker, I. C. S., at Saton near Bahrāmpur. It reads: *Oṃ Jayādityaputra-Durggadityasya kīrttiḥ*. "The glorious work of Durgāditya, the son of Jayāditya." Judging from the character, it may belong to the 8th Century.

The Saton temple had a porch of carved stone. Such a porch occurs also in the temples of Bahuā in the Fatehpur District. In nearly every other instance the façade has either collapsed or been rebuilt, so that it is impossible to decide whether the temple had a stone porch originally.

The temples consist invariably of a single cella covered by a double dome and surmounted by a spire of the usual shape. The outer surface is profusely decorated with carved brickwork divided into equal faces by vertical grooves. The carved bricks used in these temples are very different from those found in the earlier monuments such as the temple of Bhītargāon. They are much smaller in size, flat-shaped and carved on one edge with scrollwork, the bricks being joined so as to form a continuous pattern. The entire surface of the edifice is thus decorated, producing a pleasing effect of light and shade. In the older buildings, on the contrary, the carved bricks are only used for ornamental pilasters, string-courses and cornices, the rest of the surface consisting of plain masonry. Here the carved portion of the brickwork usually projects from the face of the wall, whereas in the later temples the carved bricks form a flat or slightly curved surface.

The following are the temples visited in the course of my tour:—

CAWNPUR DISTRICT.

Temple of Parauli, 2 miles north of Bhītargāon, briefly noted by Cunningham (Arch. Survey Report, Vol. XI, pp. 46f.). Its plan must

originally have been a sixteen-sided polygon externally with three sides cut off straight so as to form the *façade* which is orientated west. The north-western half of the building has collapsed. The preserved portion shows six faces decorated with carved brickwork. The cella is circular in shape. It is called Mahādeo Bābā and contains a stone *linga*.

The temples at Rar and Simbhua, five *kos* to the south and three *kos* to the west of Bhītargāon respectively I have not visited. They are mentioned by Cunningham (op. cit., p. 47).

FATEHPUR DISTRICT.

Temple at Tindulī, $1\frac{1}{2}$ mile north of Bindkī-Tabsīl, is mentioned by Growse (Suppl. Fatehpur Gaz., p. 11). The square cella is covered over with a ceiling of overlapping stone slabs resting on four pilasters and architraves of the same material. The temple faces north. The plan is circular outside, but the plinth and lower mouldings have been restored by Mr. Growse. The porch is a later addition. About 1880 the temple was repaired by Mr. Growse from a grant sanctioned by the Local Government.

Temple at Bahuā, 13 miles from Fatehpur, on the road to Banda was likewise restored by Growse. It faces east. The ground-plan is square with recessed corners. The cella measures 6' 9" by 6' 5" and the stone porch 5' by 2' 6". The latter was rebuilt by Mr. Growse. The temple is in a fair state of preservation.

Four partly ruined temples at Kurārī, some 2 miles north of Bahuā. The best preserved temple is known as Deorā Bābā. It faces north-east and contains a cella, 5' 2" square, covered over by a double Hindū dome. The ground-plan is similar to that of the Parauli temple. The remaining three temples are in an advanced state of decay.

Temple at Thithaura, some 6 miles north of Bahuā is the best specimen of its kind. It faces east and is almost square in plan. The cella is 5' 1" square and contains a broken image, apparently of Vishṇu. The porch appears to be a later addition. I was told that there exists a second temple at Thithaura, but I have not seen it.

7.—EXPLORATION.

—o—

I spent the months of February and March in excavation on the ancient site of Sahét-Mahét, Bahraich and Gonda Districts. As a preliminary report has been submitted to Government, a short notice will here suffice. I had, to start with, a grant of Rs. 3,000 originally sanctioned for continuing excavations at Kasiā. As this sum proved insufficient, it was decided to turn the work into a civil work and finance it from Famine Relief Funds. In addition to the Rs. 3,000 already sanctioned, Rs. 7,400 were spent in this manner, the total expenditure amounting to Rs. 10,400. Moreover a sum of Rs. 1,200 was granted for the preservation of the buildings excavated.

In the course of the work, a complete survey was made of the site on a scale of 200' in the inch by Mr. A. T. Wilson and a separate survey of Sahét on a scale of 20' in the inch. In the actual excavations I had the assistance of Pandit Dayā Rām Sāhni, whose services Mr. Marshall had placed at my disposal. Bābū Munnā Lāl, deputed by Mr. Oertel, Superintending Engineer, Lucknow, assisted in supervising the workmen and was left by me in charge of the repairs mentioned above. I started the work on the 2nd February with 600 men, which number was gradually raised to 1,600. Among these 1,600 men only 325 were diggers, whereas 1,000 were employed in carrying earth and 230 in clearing the jungle, which completely covered the site.

On the main site, known as Mahét, which covers an area of 40,743 acres and measures $3\frac{1}{4}$ miles in circuit, I completed the excavation of the two principal monuments—the Kachchī Kutī and the Pakkī Kutī. The former is a Brahmanical temple, built of brick and decorated with terracotta sculptures; the latter is probably a *stupa*. Not far from these buildings we unearthed one of the main gates of the city, and on the opposite (west) side of Mahét the excavation of the large Jaina temple Sobhuāth was continued. Here numerous Jain sculptures came to light.

At Sahét, which covers 3,229 acres and lies $\frac{1}{4}$ mile south-west of Mahét, we continued the work of previous explorers and completed the excavation of several buildings which they had left unfinished. These include the three temples Nos. 1, 2 and 3 of General Cunningham, his *stupa* No. 5 together with the neighbouring shrines Nos. 6 and 7, and the two temples.

Nos. 11 and 12. The large monastery which occupies the south-western portion of the mound and was partially explored by Dr. Hoey has now been completely excavated. It is of special interest as it contains a chapel facing the entrance gate and provided with an ante-room and a procession path. Near this chapel, several sculptures, partly inscribed, came to light, including a statuette of Jambhala, the Buddhist god of wealth.

The most important find made in the monastery is a well-preserved copper-plate placed in an earthenware case which was discovered in the foundation of one of the cells. It records a donation of six villages to the Community of Buddhist friars residing in the Jetavana by Govinda Chandra, the king of Kanauj, whose grandson was ousted by the Muhammadans. This inscription, therefore, establishes the identity of Sahét with the Jetavana and consequently that of Mahét with the city of Śrāvastī, and thus settles a long disputed question of ancient topography.

The objects discovered in the course of the work have been sent to the Lucknow Museum. They comprise stone and terra-cotta sculptures, ancient coins, carved bricks and pottery. As the museum building does not afford space for their proper exhibition, those finds have been left unpacked and stored away in the *takkhāna*.

Statement of Expenditure on Excavations at Sahét-Mahêt (Gonda and
Bahraich Districts) carried on during the year 1907-08.

No.	Sub-head.				Amount of Expenditure.	Total.
1	Salaries and travelling allowance—

Total Sanction					...	10,000 0 0
Excess expenditure					...	389 9 0

N. B.—Sanction for the excess expenditure has been applied for.

8.—EPIGRAPHY.

—o—

The year 1907-08 has been fruitful in epigraphical discoveries. At Mathurā some fresh Brāhmī inscriptions of the Kushāṇa period have come to light which are of special interest in connection with the sculptures on which they occur. Two of these I wish briefly to note. Among the sculptures acquired by Paṇḍit Rādhā Krishna for the Mathurā Museum is a well-preserved seated Buddha statuette (ht. 2' 3 $\frac{1}{4}$ "). The Paṇḍit discovered it at the Kaṭrā in the house of a Brāhmin who ignorantly worshipped it as the Brahmanical patriarch Viśvāmitra. The four attending figures—two flywhisk-carriers and two flower-showering celestials, the owner took to represent Rāma and his brothers Lakshmaṇa, Bharata and Śatrughna!

The inscription, which is cut in three lines on the pedestal reads :—

1. *Budharakhitasa mātare Amohā āmsiye Bodhisacho patihāpito*
2. *sahā mātāpitihi Sakavihāre*
3. *savasatvānā[m]hitasukhāye.*

"Budharakhita's mother, Amohā-āmsī has erected this Bodhisattva image together with her parents at the Saka-vihāra for the welfare and pleasure of all sentient beings."

It is curious that the inscription describes the statuette as a Bodhisattva (Prākṛit *Bodhisacho*), though it presents the same appearance as the Anyor one which is designated as a Buddha image. Unfortunately the head of the latter is lost so that we cannot decide whether the two are similar in every respect. Anyhow, we may assume that the Kaṭrā image represents the historical Bodhisattva Śākyamuni so that, after all, the two statuette depict the same personage.

The term Saka-vihāra I take to denote a Buddhist Convent founded by one of the Śāka satraps of Mathurā whose rule preceded that of the Kushāṇas. I must, however, admit the possibility that the word corresponds to Sanskrit *śakavihāre* "in her own monastery." I have chosen the former interpretation as it seems more natural and is supported by the evidence of other votive inscriptions in which the convent where an image is set up is always indicated by a distinct proper name.

Another inscribed image of great interest is a colossal Nāga statue (ht. 7' 4") which Paṇḍit Rādhā Krishna pointed out to me near the village

of Chharghaon, 5 miles due south of Mathurā. It is now placed in the Mathurā Museum. The Nāga is recognizable by the sevenfold snake-hood surmounting him. He is standing with his right hand raised over his head. The left hand is broken, but from the analogy of a similar Nāga image in the Mathurā Museum we may assume that it held a cup.

On the back of the statue is a well-preserved inscription in six lines dated in the 40th year in the reign of Huvishka. It thus supplies a new link in the chain of dates of the Indo-Scythian period. The image is distinctly referred to in the inscription as "the Lord Nāga" (*Bhagavā Nāgo*). It was erected in connection with the construction of a tank (*pukharani*) and thus affords additional proof that these so-called "Snake-gods" are not human-shaped reptiles, far less deified heroes, but water spirits propitiated in their alternately beneficial and destructive nature. Brahmanical and Buddhist legend bear ample evidence to the same effect.

The prevalence of Nāga worship in ancient Mathurā is also evidenced by an inscribed slab* found in the Jamālpur Mound and now preserved in the Lucknow Museum. It was erected as stated in the inscription "at the place sacred to the Lord, the Nāga king Dadhikarṇa."

The Chharghaon image also affords tangible proof that side by side with Buddhism there flourished in Mathurā these popular cults of the deified elements of nature, the origin of which is lost in obscurity. We can thus better understand the endeavours of Buddhist preachers who converted the capricious Nāgas and savage Yakshas into devout worshippers of the Lord Buddha.

One more point is to be noticed. The Nāga of Chharghaon still received occasional homage from the villagers, but they had converted him into an orthodox Brahmanical deity—Dāujī, alias Balarāma the brother of Kṛishṇa. It very often occurs that ancient images of heterodox sects are worshipped nowadays under the name of some Hīndū god or goddess. Above I have quoted the instance of the Kātrā Buddha who had become Viśvāmītra. But in the case of the Chharghaon it is curious that there are in and round Mathurā other instances in which an ancient Nāga image is being worshipped as Balarāma.† The snake-hood is explained as indicating Śesa-nāga of which Balarāma is believed to be an incarnation. The cup in

* Cf. Bühler, *Epigr. Ind.*, Vol. I, p. 390, No. XVIII where it is erroneously stated that the inscription was found in the Kaṅkāli Tīlā. Cf. Growse, Mathurā.

† For this reason Mr. Growse identified the Nāga figure in the Mathurā Museum with Balarāma.

his left hand is said to refer to his drinking propensities. May we assume that not only these images but the characteristics and the person of Balarama also are derived from the ancient Nāgas which once played such a prominent part in the popular religion of India?

Three copper-plate inscriptions discovered in the United Provinces belong to three rulers of the Gaharvār dynasty of Kanauj and form a valuable contribution to our knowledge of the period immediately preceding the Muhammadan conquest. Earliest in date is the Chandrāvātī plate, dated *Samvat* 1148 (A. D. 1099), of Chandra-deva, the founder of the Gaharvār or Rāthor dynasty. Next comes the Sahet copper-plate which has already been discussed in the previous chapter. It is dated *samvat* 1186 (A. D. 1128) and is a record of Govinda-chandra, the grandson of Chandra-deva. The importance of that ruler may be estimated from the abundance of his copper-plates which range from 1104 to 1155. His grandson Jayachandra was the last Hindu prince of Kanauj who was defeated and killed in 1193. It appears, however, that his son Hariś-chandra still held sway over part of his ancestral domains. For the third copper-plate, dated *samvat* 1253 (A. D. 1195), is issued by this prince, of whom, as far as I know, no other record has yet come to light.* It was found in a famine work at Machhlisnahr, Jaunpur District. The success of archaeological work in the United Provinces is indeed partly due to the prevailing famine conditions.

Finally, I wish to note an inscription which, though discovered after the close of the official year, has been included in my list of inscriptions on account of its interest. It is incised on a stone *linga* measuring 2' 9" in height which has come to light in a mound called Bharadi Dīh, near the village of Karamdāndā, Faizābād District. It is dated in the 117th year of the Gupta era (A. D. 436) on the 10th of Kārttika. It is the record of a Prithivī-sheṇa who was Councillor and Minister of the crown prince (*mantri-kumārāmātya*) and afterwards General (*mahābalādhipātya*) under the Gupta Emperor Kumāra-gupta I. The inscription mentions that Prithivī-sheṇa's father Śikhara-swāmin was *mantri-kumārāmātya* of Kumāra-gupta's father Chandragupta II, Vikramāditya, from which it appears that this office was hereditary.

* Possibly he is the ruler mentioned in the Belkharā pillar inscription. Cf. *J. R. A. S.* for 1903, pp. 791 f.

2.—ACQUISITIONS FOR MUSEUMS.

—o—

A.—LAHORE MUSEUM.*

GANDHARA SCULPTURES.

1. Imago (height 4' 5" ; width 1' 11") of the goddess Hārītī (?) clad in a well draped robe and wearing a flat torques and a necklace hanging down between the breasts, bracelets round the upper arms and a wreath on the head. The feet, arms below the elbows and nose are broken. It was found by Bhagvanlāl Indrajī in the Saptarshi Tīlā at Mathurā. Cf. *J. R. A. S.*, 1894, pp. 542—543 and Burgess, *Ancient Monuments* ; plates 56 and 57.

2. Imago (height 4' 7" ; width 1' 6") of Buddha standing with the right arm (hand missing) raised and the left holding the hem of the robe. Plain circular halo. On front of pedestal a relief enclosed between two Indo-Corinthian pilasters which support a cornice decorated with acanthus leaves. In centre relic casket placed on a throne under a canopy. It is worshipped by six devotees. Those to the proper right are a monk and two women, those to the left three monks, the first of whom carries a garland (?). The sides of the pedestal are decorated with two lotus rosettes ; the proper left side is defaced.

3. Imago (height 3' 7" ; width 1' 2") of Buddha standing with the right arm (hand missing) raised and the left holding the hem of the robe. Plain circular halo. The image is broken in two above the feet. On pedestal lotus-border enclosed between two Indo-Corinthian pilasters.

4. Torso (height 1' 9" ; width 11½") of Buddha standing with the right arm raised and the left holding the hem of the garment. Both hands missing.

5. Pedestal (height 1' 2" ; width 10½") of standing Bodhisattva imago of which only the sandaled feet remain. On front a relief enclosed between two Indo-Corinthian pilasters which support a cornice decorated with acanthus leaves.

6. Head (height 1' 3½" ; width 10") of colossal Buddha image. Ūṛṇā marked by a cavity which originally must have held a precious stone. Hair arranged in schematic rows of curls.

7. Head (height 11½" ; width 6½") of a Buddha image of natural size. Ūṛṇā marked by a cavity which originally must have held a precious stone. Hair arranged in wavy locks.

8. Mask (height 1' ½" ; width 7½") of head of a Buddha of natural size. Nose and forehead damaged. Hair arranged in wavy locks. *Ushnīsha* treated as a *krobulos* tied up with a cord.

*Nos. 1—50 have been transferred to Lahore from the Municipal Museum, Delhi.

* 9—12. Four heads (height 8" ; width $4\frac{1}{2}"$, $7\frac{1}{2}" \times 4\frac{1}{2}"$, $7\frac{1}{2}" \times 4"$ and $7" \times 4"$ respectively) of Buddha image of less than natural size. Hair arranged in wavy locks.

13. Statuette (height 1' 6" ; width 5") of Buddha standing. Arms and halo damaged ; feet and pedestal missing.

14. Torso (height 1' ; width 6") of standing Buddha statuette. Arms partly missing.

15. Statuette (height $8\frac{1}{2}"$; width $10\frac{1}{2}"$) of headless Buddha seated cross-legged in the attitude of preaching on a lotus throne supported by an elephant, two crouching atlantes and two lions. The latter are an indication that Buddha's seat is meant for a throne (Sanskrit *siṃhāsana* literally "lion-seat"). There are traces of attending figures, probably Bodhisattvas, which once stood on both sides of the Buddha figure.

16. Fragment (height 1' $5\frac{1}{2}"$; width 1' $\frac{1}{2}"$) of a bas-relief representing the Dīpaṅkara-jātaka. Both the ends of the sculpture with the figures of Dīpaṅkara Buddha and the flower-girl are lost. Of the Buddha only the right foot is still visible. The preserved portion contains the figure of Sumedha five times, first buying the lotus-flowers from the girl, then approaching the Buddha, then kneeling and spreading out his hair as a carpet for the Buddha to walk on, then presenting the lotus-flowers (both arms missing) and finally rising in the air (defaced). The sculpture is much injured. The crenelated top of the city wall of Dīpavastī can still be traced above.

17. Bas-relief (height 8" ; width $9\frac{1}{2}"$) representing Buddha seated cross-legged on a throne placed under a tree of which the foliage is visible over his head. His right hand is raised in the attitude of protection. To his right three monks with shaven heads are standing, the one in front with folded hands, the second carrying an offering (?) and the third behind showering flowers. On the proper left side there were probably the same number of monks. But only the one in front carrying an alms-bowl is preserved. The other two figures are lost with part of the sculpture.

18. Fragment (height 1' $4\frac{1}{2}"$; width $11\frac{1}{2}"$) of a bas-relief containing two panels enclosed within a double border. The upper panel shows Buddha seated cross-legged on a low platform under a tree of which the foliage is visible over his head. His right hand is raised, his left holds some indistinct object. To his right two male figures are standing holding each a round object. They are dressed in tunics, trousers and shoes and wear ornamental turbans. Behind the second one a palm-tree. The lower panel shows Buddha seated cross-legged on a low platform under a tree of which the foliage is visible over his head. His right hand is raised and his left holds an alms-bowl. To his right three male figures in royal dress are standing, marked by their haloes as divine beings. The two in front carry each an alms-bowl in the right hand. Over the third one is some foliage. The scene seems to refer to the presentation of the four cups by the four *lokapālas*. The proper left side of the sculpture is missing.

19. Fragment (height 7" ; width $4\frac{1}{2}"$) of a bas-relief containing a female figure seated on a throne, both feet resting on a footstool. A circular halo marks her as a divine being. She holds in her left arm a nude child standing on her left knee and

embracing her with both arms. Its head is lost. Her right hand is raised towards a second child which is visible over her shoulder. The figure presumably represents the Yaksha queen Hārītī with her children. The proper right half of the sculpture which is broken must have contained the figure of the Yaksha king Kubera.

20. Fragment (height 6" ; width 1' 3½") of a frieze containing two figures under ogee arches alternating with Indo-Persopolitan pilasters. One figure is a Buddha seated cross-legged on a low platform, both hands resting in the lap in the attitude of meditation. The other figure is a male, clad in an ample robe and a turban and standing with a flower in his right hand.

21. Fragment (height 1' 8" ; width 5½") of an upright with three small panels, each containing two male figures standing in the attitude of adoration. Those in the uppermost panel are monks and those in the two lower panels lay-members. Along the proper right side of the sculpture there runs a border of vine leaves.

22. Fragment (height 9" ; width 3½") of an upright containing portions of two panels. The lower panel has a male figure standing with the hands folded in front of the breast. The upper panel seems to have contained a similar figure, broken above the knees.

23. Fragment (height 5½" ; width 3") of an upright containing one complete central panel and portions of two broken panels above and beneath. In each panel there are two figures standing.

24. Fragment (height 3½" ; width 6½") of a frieze with a Buddha figure seated cross-legged in meditation under a tree and a worshipping male figure kneeling on each side. On the proper left side where the sculpture is broken there seems to have been a similar scene separated from the first by an Indo-Corinthian pilaster.

25. Fragment (height 2¾" ; width 6½") of a circular frieze containing Buddha figures separated by trees (?) surmounted by a modillion cornice.

26. Fragment (height 3½" ; width 1' 7") of the circular drum of a miniature *stūpa*. In centre Buddha seated cross-legged in meditation under a tree with four adoring figures standing to his right and three to his left. This scene seems to have been repeated all along the frieze, the groups of figures being separated by trees. Modillion cornice above.

27. Fragment (height 5" ; width 10") of a frieze consisting of a row of garland-carrying cupids, of which two are preserved.

28. Fragment (height 3½" ; width 10½") of circular frieze with figure of Buddha seated in meditation under a tree with two garland carrying cupids on each side. Indo-Corinthian pilaster to proper right and modillion cornice above.

29. Fragment (height 1' ; width 8") of circular slab (halo ?) with projecting figures of male worshippers standing with folded hands in the attitude of adoration.

30. Bas-relief (height 4" ; width 9") with figure of Buddha, seated cross-legged in meditation under a tree and two male lay members kneeling on each side. Indo-Corinthian pilaster to proper left and modillion cornice above.

31. Capital (height $5\frac{1}{2}$ " ; width 9") of Indo-Corinthian pilaster with Buddha figurine seated in meditation inserted in the foliage.

32. Fragment (height 3" ; width 2") of modillion cornice with five complete and one broken bracket.

33. Fragment (height 2" ; width $8\frac{1}{2}$ ") of modillion cornice with four complete and one broken bracket.

34. Bracket (height 3" ; width 9") of a modillion cornice.

35. Fragment (height $7\frac{1}{2}$ " ; width 1' 11") of a frieze consisting of a Buddhist railing surmounted by an acanthus cornice.

36. Fragment (height 6" ; width $9\frac{1}{2}$ ") of a slab ornamented on three sides with rosettes and half-rosettes enclosed in plain raised borders.

37. Fragment (height 3" ; width 1' 9") of a cornice ornamented with a rope border.

38. Fragment (height $1\frac{1}{2}$ " ; width $5\frac{1}{2}$ ") of a cornice decorated with acanthus leaves.

STUCCO FIGURES.

39. Head (height 8") of Buddha figure. Nose and right ear slightly damaged. Hair treated in schematic rows of locks. High *ushnīṣa* ; no *ūrṇā*.

40. Head (height $6\frac{1}{2}$ ") of Buddha figure, well preserved, hair treated in schematic rows of locks. *Ushnīṣa* ; no *ūrṇā*.

41. Head (height $5\frac{1}{4}$ ") of Bodhisattva (?) figure. Nose and ears broken. Surface slightly damaged. Ornamental head-dress. Traces of *ushnīṣa*.

42. Head (height 5") of Bodhisattva (?) figure. Nose and ears broken. Surface damaged in places. Ornamental head-dress.

43. Head (height $2\frac{3}{4}$ ") of Buddha (?) figurine. Nose and ears broken. Surface defaced.

44. Head (height 5") of lion with protruding eyes and tongue. Lower jaw and part of upper jaw lost. Manes marked on the forehead.

45. Fragment (height $3\frac{1}{2}$ ") of lion's (?) head. Proper left half missing. Manes marked on the forehead.

MISCELLANEOUS.

46. Fragment (height $12\frac{1}{4}$ " ; width 13") of a slate inscribed with an incomplete Tibetan inscription of eight lines. Of the ninth line only the upper portion is partly preserved.

47—48. Two tablets (height 5" ; width $3\frac{3}{4}$ ") of baked clay, incased in wooden frames. They represent Gautama Buddha seated cross-legged on a lotus seat inside a chapel surmounted by a *śikhara* spire. Round the spire the foliage of the

Bodhi tree (*Ficus religiosa*, Hindi *pīṭā*) is visible—indicating that the Buddha is shown here at the moment of his enlightenment (*bodhi*). This is confirmed by the position of his right hand with which he touches the earth in order to call her to witness of his good works. This attitude is technically known as the earth-touching attitude (Sanskrit *bhūmisparśa-mudrā*). The space on both sides of the chapel is filled with *stūpas* of various sizes, as are actually found round important Buddhist shrines.

Below the lotus-seat is an inscription in three lines containing the so-called Buddhist creed. Judging from the character, these tablets seem to belong to the 7th or 8th Century of the Christian era.

49. Illustrated Hindi Manuscript entitled "Rāg aur Rāgar".

50. Harmony of the four Gospels and other book in Tibetan printed at Kyelang (British Lahul) at the Moravian Mission Press.

51. Statuette (height o. m. 22) of a Bodhisattva seated cross-legged on a throne. His right hand is raised to the shoulder, the left holds a vessel. He has a circular halo and wears the usual ornaments. The sculpture is Gandharian; but it is of a debased type and probably of a comparatively late date.

52. Fragment (height o. m. 125; width o. m. 285) of a sculpture which evidently formed the top of an image slab. It contains two flying male figures holding a casket, which must have been over the head of the image. Apparently there was a row of female figures, likewise flying and carrying offerings, on both sides of the halo. Only one of these figures is entire and two are partly preserved. It was found near Mandiān, Talātī Dhurī, Patāla State.

TIBETAN PAINTINGS.

FROM LADAKH.

53. Picture on canvas mounted on cloth (height 3'). The central figure is a Buddha seated on a lotus in "the earth-touching attitude." It is surmounted by five smaller Buddha figures seated cross-legged on lotus-seats and distinguished by various gestures. In the proper left lower corner is the figure of Vaiśravaṇa or Kubera (Tibetan *rNam-thos-aras*) the god of wealth, holding a lemon in his right, and a pearl-vomiting mongoose in his left hand. The six Buddha figures probably represent the six predecessors of Śākyamuni, though the gestures (Sanskrit *mudrā*) do not quite agree (*Cf. Grünwedel, Mythologie des Buddhismus in Tibet und der Mongolei*, p. 9, fig. 4).

54. Picture on cloth (1' 1½") with nine demonical figures each of which is marked with an inscription in Tibetan. The central figure has three faces and six arms in which he holds a thunderbolt, a trident, a mace (?) to the right and a ball, a skull (?) and an arrow to the left. He has a frontal eye and a diadem of skulls. He clasps his Śakti who is white-coloured and holds a skull in her left hand. Both figures are surrounded by a halo of flames. The remaining seven figures are animal-headed witches.

ANTIQUITIES FROM SUNET (LUDHIANA DISTRICT).*

55. A square terra-cotta tablet ($3\frac{1}{4}$ " wide) carved on both sides.
56. A square terra-cotta tablet nearly 2" broad with three parallel curves on one side.
57. A fragment of sandstone, 3" by $2\frac{3}{8}$ ", with flower pot in relief.
58. Fragment of stone.
59. A circular disc of baked clay, 4" in diameter, having a *yantra* or spell (?) carved on both sides.
60. A small rectangular terra-cotta tablet, 2" by $1\frac{1}{2}$ ", with three curves on one side.
61. A spindle whorl.
62. A square tablet of baked clay, 1" broad, with some lineal marks on both sides.
63. A rectangular tablet of clay, 1" by $\frac{3}{4}$ ", with marks on one side.
- 64—80. Seventeen circular clay sealings of four different dies bearing the following legend in two lines : (1) *Śaṅkara-Nā* (2) *rāyaṇābhyā*[m]. The length of their diameter varies between $1\frac{1}{4}$ " and $\frac{3}{4}$ ". The four dies must have belonged to different dates. They may be assigned to the Kushāṇa and early Gupta periods. One sealing has a seal-impression on the reverse contained in an ellipse and consisting of a trident and two letters which appear to be *nābhyā*. Another has on the reverse the legend *Hari[ś]arm[m]a* with indistinct symbols above.
- 81—82. Two sealings with elliptical impression ($\frac{3}{4}$ " \times $\frac{1}{2}$ "). Legend : *Śrī Kṛishṇadattasya*. Early Gupta period. The symbol shown above this legend is that of a quoit (*chakra*).
- 83—86. Four sealings with elliptical seal-impression ($\frac{3}{4}$ " \times $\frac{5}{8}$ "). Legend : *Hari[ś]arma* ; conch symbol above. Kushāṇa period. Cf. above sub No. 64—80.
- 87—89. Three sealings with rectangular seal impression ($\frac{13}{16}$ " \times $\frac{3}{4}$ "). Legend : *Rudraśarma* with a trident above. Kushāṇa period.
90. Elliptical clay sealing with a diademed head to the right. The axes of the seal are 1" and $\frac{7}{8}$ " approximately.
91. Elliptical clay sealing, the axes being 1" and $1\frac{1}{4}$ ". Its one side represents a trident.
92. A circular sealing $1\frac{1}{8}$ " in diameter. Legend : *Gaṅgabhadra* (?), with trident and a snake above.
93. A spherical clay sealing, the axes of which are $\frac{3}{4}$ " \times 1". The legend on one side is *Gaṅgabhadra* written under a trident. That on the other is a trident and *Gaṅga* in one line.
94. Circular clay seal nearly 1" in diameter. The legend is : *Śrī-Vishṇu-mah.*
- 95—97. Three irregular-shaped clay sealings. The largest is $\frac{7}{8}$ " long at one side, the smallest too is $\frac{7}{8}$ " long at the middle. The legend is *Mara* (?) and a trident in

* This and the following lists have been prepared by my assistant Pandit Hirananda.

one line. The smallest one bears a legend consisting of four letters on the reverse.

98. Elliptical sealing 1" in diameter. The legend seems to be : *Śrī Mitra (gupta)ya*.

99. Elliptical sealing, axes, $\frac{7}{8}$ " and $\frac{5}{8}$ " long. The legend enclosed by an elliptical curve is *Vishṇutrāta*.

100. An irregular elliptical-shaped clay sealing, the largest axe of which is $1\frac{1}{8}$ ". One side contains a legend which seems to be : *Māgha-śīlasya*.

101. Circular clay sealing $\frac{3}{4}$ " in diameter. It has a gourd-like sign above the legend which seems to be *Śrī-Vishṇudāsasya*.

102. Sealing with two seal-impressions on the obverse. Legend not read.

103. Circular (?) clay sealing about 1" in diameter, axes 1" and $1\frac{1}{2}$ " in length. Legend under the representation of a club (?) and a human figure (?) is : *Jitām Bhagava[tā]*.

104. A circular clay sealing, $1\frac{1}{4}$ " in diameter, with a couchant lion and the legend *Śrīvarmasya* underneath on one side.

105. An elliptical clay sealing 1" by $1\frac{1}{4}$ " in dimensions. The legend on the obverse is *Śaṅkara-Nārāyaṇābhyaṁ* and on the reverse only two letters *sasya* are distinct. (Cf. No. 64—80).

—o—

B.—ACQUISITIONS LUCKNOW MUSEUM.

OBJECTS PURCHASED AT KOSAM, ALLAHABAD DISTRICT.

TERRA-COTTAS.

1. Seal with rectangular base and trapezoidal elevation. It is surmounted by a circular handle which is pierced by a small hole and has the *Svastika* emblem at the top. Four lines in low relief which go round divide the portion between the handle and the base into four parts. The base measures $1\frac{1}{2}$ " by $1\frac{11}{16}$ ". The height is $1\frac{9}{16}$ " and the top is $1\frac{3}{16}$ " in diameter. The legend written on the base is in Prākṛit. To read it we have to proceed from the left upper corner and turn the seal round. It runs :—*Kiṇhanadisa. Sanskrit Kṛishṇa-nandinah* "Of Kṛishṇanandin."

On palaeographic grounds this seal can be ascribed to the 4th Century A. D. As the letters are not reversed, it appears that the seal was not intended for making impressions. The hole in the handle was probably meant for passing a ring.

2. A tablet ($3\frac{9}{16}$ " × $4\frac{1}{8}$ ") damaged at the sides. It represents a male and a female figure seated on an ornamental chair in an amorous attitude with their feet resting on a footstool. The background has floral ornamentation and the chair is shown in perspective. Two small holes at the upper corners indicate that the tablet was meant for hanging.

3. A tablet (2 " × $5\frac{3}{8}$ ") with a female figure standing with her hands resting on the girdle. She wears a peculiar head dress like a turban, ear-rings, necklace, bangles and anklets.

The resemblance, which this as well as the three following figures bear with those on the Mathurā railing-pillars (for which see V. A. Smith. *The Jaina Stūpa of Mathurā* plates LXL-II) would indicate that they belong to the same age.

4. Female figure ($1\frac{1}{2}'' \times 4\frac{1}{2}''$) standing with her right hand placed on the thigh. She holds in the left hand an indistinct round object against her shoulder and wears ear-rings, necklace, etc.

5. A small worn figure of a female ($2\frac{1}{2}'' \times 4''$) standing with her right hand placed in front of the body and the left arm extended downwards holding an indistinct object in the hand. The legs are disproportionately long.

6. Figure of a standing female ($2'' \times 4\frac{1}{4}''$) with lower portion broken. It has very elaborate head-dress, necklace and girdle, thin waist and broad hips. The hands with wristlets put on, are placed on the girdle. The small aperture at the middle of the head-dress would indicate that it was intended for hanging.

7. Bust of a female ($2\frac{3}{8}'' \times 3\frac{1}{8}''$) wearing disproportionately large ear-rings, a necklace and a head ornament. The right ear and the nose are damaged and the figurine appears to be a fragment. Round the head there are three large holes the use of which is not apparent.

8. Fragment ($2\frac{13}{16}'' \times 3\frac{3}{8}''$) of a female figurine with left hand raised above shoulder and top pierced with small circular cavity.

9. Fragment ($2\frac{1}{16}'' \times 2''$) with bust of a female whose right hand, ornamented with bangles and wristlet, holds the right ear-ring. The left fore-arm which is broken probably rested on the hip. The tiara-like head-dress is peculiar. There is floral decoration round the head and the top is pierced by a small aperture.

10. A tablet ($3'' \times 4\frac{1}{4}''$) with a male and a female figure standing. The lower portion of it is broken and the top is pierced by a hole. The female figure has a turban-like head-dress.

11. Male figurine ($1\frac{1}{4}'' \times 3\frac{1}{8}''$) squatting with his hands placed on the knees. He wears ear-rings, necklace and coat and has a peculiar head-dress which is pierced by a small aperture that might have been meant for passing a ring. The object in the left hand may be a money bag in which case the figure would represent Kubera. Large circular hole is to be seen midway between the legs.

12. Male figure ($2\frac{1}{8}'' \times 4''$) like No. 11. The head-dress is slightly different and the hole is made beneath the figure.

13. Male figure ($2\frac{3}{16}'' \times 3\frac{1}{8}''$) resembling No. 12 except that it has no hole.

14. Male figure ($1\frac{1}{8}'' \times 3\frac{1}{8}''$) like No. 13, with a small circular hole piercing the upper portion of the head-dress.

15. A much worn male figure ($1\frac{11}{16}'' \times 3\frac{5}{16}''$) like No. 14.

16. Male figure ($2''$ by $3\frac{3}{4}''$). Description as before. Its lower portion is broken. Privities appear to have been exposed, hence the representation seems to be nude.

17. Male figure ($2'' \times 4''$). Description as in No. 16. The broken back shows that these figurines are hollow within.

18. Male figure ($2'' \times 3\frac{1}{2}''$) like No. 13.
19. A grotesque male figure ($2\frac{1}{8}'' \times 3\frac{1}{2}''$) squatting and covering his chin with both hands. Right side is much worn. Anklet is to be seen on the left foot. It seems to be rude. The top of the head is pierced by a small cavity.
20. Upper body of a ram ($2\frac{1}{4}'' \times 3\frac{1}{2}''$) decorated and with forelegs turned upwards. It is pierced from right to left shoulder and there is a deep hole at the top of the head. One deep and large hole is to be seen at the head. It is pierced with two more holes—one on each side under the horns. Possibly this is a toy and the cavities were intended for passing a piece of wood or a ring to turn it round.
21. Figure ($5'' \times 3\frac{1}{2}''$) representing the upper part of a ram's body, surmounted by a curious ornamentation on the head and mutilated. Other particulars are like those of No. 20.
22. Figure ($4'' \times 4\frac{1}{2}''$) like No. 21 but has no ornamentation on the head and is much worn.
23. Figure of the upper body of a ram ($2\frac{1}{2}'' \times 3\frac{1}{2}''$) resembling No. 21. The hole under the left horn is broken and the ornamentation is worn.
24. Figure ($2\frac{3}{8}'' \times 3\frac{1}{8}''$) of a ram similar to No. 22.
25. Figure ($2\frac{1}{4}'' \times 3\frac{3}{8}''$) like No. 22 ; but appears to have had no holes under the horns.
26. Figure ($3'' \times 3\frac{1}{4}''$) like No. 25.
27. Figure ($2\frac{1}{2}'' \times 3\frac{1}{4}''$) resembling No. 20. Much worn.
28. Fragment ($1\frac{1}{2}'' \times 3\frac{1}{2}''$) representing an ornamented pair of arms.
29. Fragmentary human head ($3'' \times 6''$) with a turban.
30. Head ($3\frac{5}{8}'' \times 5\frac{1}{2}''$) of a pot image with disproportionately large ears and protuberant turban. Its left ear is partly broken. (Cf. pot images of Kasiā).
31. Head ($3\frac{1}{4}'' \times 3\frac{1}{4}''$) of pot image with round face, prominent eyes and disproportionately long ears. The right ear has a large ring and the left ear is broken.
32. Head of pot image ($1\frac{7}{16}'' \times 3\frac{1}{2}''$) with *Śikha*.
33. Human head ($2'' \times 3\frac{3}{8}''$) like No. 32. Here the *Śikha* is circular, broad and bulged upwards so as to resemble a cap.
34. Human head ($3\frac{1}{2}'' \times 4\frac{1}{4}''$) with right ear smaller than the left one.
35. Head ($3\frac{1}{4}'' \times 4\frac{7}{16}''$) of a pot image with a turban. The depressed nose and the eyes, one of which is higher than the other, as well as the open lips make it a very ugly representation.
36. Human head ($3\frac{1}{8}'' \times 4\frac{9}{16}''$) with a semi-circular turban resting on the ears and open mouth.
37. Human head ($4'' \times 5\frac{5}{16}''$) of pot image with broken image and much worn.
38. Male figure ($2\frac{3}{8}'' \times 4\frac{1}{2}''$) of a very poor make with lower portion broken and no left arm.

39. Human ? figurine ($1\frac{3}{8}'' \times 2\frac{3}{4}''$). Much worn.
40. Figurine ($3'' \times 4''$) of a man standing with right hand raised against right shoulder and left placed on the girdle. It wears necklace and girdle. Head and legs lost. It resembles Mathurā figures referred to in No. 3.
41. Spout ($2'' \times 2\frac{1}{4}''$) held by a *makara* head.
42. Spout $1\frac{1}{2}'' \times 2\frac{1}{4}''$ like No. 41.
43. Indistinct object ($1\frac{3}{4}'' \times 1\frac{13}{16}''$) with carved concentric circles.
44. Round tablet $1\frac{3}{8}''$ in diameter with the figure of an elephant in relief.
45. A broken walnut ? like piece $2''$ broad.
46. A square mould, $2\frac{1}{2}''$ in height, probably used for printing cloth.
47. Mould ($2\frac{1}{8}'' \times 2\frac{1}{8}''$) shaped like a horse shoe and like No. 46 used for printing cloth.
48. Elephant ($1\frac{1}{2}'' \times 3\frac{7}{8}''$) mounted by a man of whom only the left leg remains. It has ornamental depressions on the back; legs and face gone.
49. Fish ($1\frac{1}{4}'' \times 2\frac{1}{4}''$) pierced by a hole meant probably for passing a ring.
50. Head of a pot image ($1\frac{1}{8}'' \times 1\frac{7}{8}''$); left ear lost.
51. One half of a hollow globe of baked clay ($3\frac{3}{4}''$ in diameter), with ledge round the edge and a pierced projection. It may be a censer (Cf. Kasiā censer of metal).
52. Spindle whorl ? $1\frac{11}{16}''$ of sun dried-clay.
53. An indistinct object of clay ($\frac{11}{16}'' \times \frac{13}{16}''$) with depressed sides.
54. Fragment ($\frac{7}{8}''$) of polished black pottery.
55. A seal-like object of clay ($1''$ in diameter) with floral ornamentation in low relief.

STONES.

56. Round lid of stone (steatite ?) $2\frac{7}{8}''$ in diameter.
57. Lid of a casket $1\frac{13}{16}''$ in diameter.
58. Tablet ($2\frac{1}{8}'' \times 2\frac{11}{16}''$) carved with a male figure. Perhaps it represents a Triton as found in Mathurā sculpture.

59—69. ⁹ Troy weights. Two of them which are heaviest weigh nearly $2\frac{1}{2}$ tolas and are of highly polished black marble ? The lightest weighs nearly 2 mashas.

60. Fragment of a soft stone ($1\frac{1}{4}''$ long) pierced with a small hole at one side.
61. Fragment of a variegated soft stone $\frac{3}{4}''$ long and $\frac{7}{8}''$ in width.
- 62—84. Beads.
85. Indistinct object of soft stone ($\frac{7}{16}'' \times 1\frac{1}{16}''$). Its peculiar shape resembles the letter M surmounted by the figure 8.

METALLIC PIECES.

- 86—121. Pieces of some alloy—perhaps of copper—probably fragments of ornaments.
122. Fish ($\frac{2}{16}'' \times 1''$) of bell metal.
123. Tortoise ($\frac{13}{16}'' \times 1''$) of bell metal (?)
124. Bead ($\frac{3}{8}''$ in diameter).

125—126. Thimbles ($\frac{3}{8}$ " \times $\frac{3}{8}$ "). One has a small hole on both sides.

127. A hollow bell-like object of brass (?) ($\frac{4}{8}$ " \times $\frac{3}{8}$ ") with concentric circles on the outer surface.

128. Thimble-like object, $\frac{3}{8}$ " \times 1", of lead (?) surmounted by a cap.

ANNUAL PROGRESS REPORT
OF THE
ARCHÆOLOGICAL SURVEY
NORTHERN CIRCLE
FOR THE
Year ending 31st March 1909.

—:0:—

PART I.

GENERAL REMARKS.

1. Statements of the expenditure under this head are given in
Conservation. Appendix A.

The most important works carried out during the year under report are the repairs to the ancient stone temple at Baijnāth, Kangra District, which are stated to have been completed, and the repairs to the ancient brick temple at Bhītargāon in the Cawnpur District which are in progress and should be completed during 1910. My proposals with regard to the necessary repairs to the temple at Bhītargāon and other ancient monuments in the Cawnpur District together with a list of ancient monuments declared protected under the Ancient Monuments Act of 1904, will be found in Part II of this report.

2. The final report on the excavations at Sahēth-Mahēth will
Exploration. appear in the Annual Report of the Archæological Survey

Department for 1907-08. These excavations were continued by the Director General of Archæology during the last cold season. During the hot season Pandit Radha Krishan cleared the Ganeshar and Sitohā tanks near Mathurā (Muttra) at a cost of Rs. 200 but the results were disappointing, the sculptures found in the course of the work being insignificant and worn. A detailed list of acquisitions for the museums will be found in Appendix, B.

3. During the year under report twelve more epigraphs were dis-
Epigraphy. covered. Eight of these are inscribed on stone, three engra-

ved on copper-plates and one on a bronze pillar. The earliest of these comes from Garhwā in the Allahabad District. Palaeographically it can be relegated to the second century A. D. The inscription from Sīyā in Chambā State belonging to the 1st year of Āsaṭa and the one at Dihuli in the Mainpuri District of the United Provinces which is dated Samvat 1486 in the reign of Śrī Vīra-Simhadēva, possess some historical interest. Of the

copper-plates the one belonging to the reign of Paramārdideva and dated Samvat 1233 is the earliest. A detailed list of inscriptions copied, will be found in Appendix C.

4. Notes on this subject by Dr. Vogel will be found in Part II of Museums. this report.

5. A list of publications prepared by Dr. Vogel and others will be Publications. found in Part II of this report. The only notes that I have had printed myself being "Conservation Notes on the Ancient Monuments in the Cawnpur District, dated 1909," which have not yet been received from the press.

6. A descriptive list of photographs taken on tour will be found in Photographs. Appendix, D.

7. A list of drawings prepared during the year will be found in Drawings. Appendix, E.

8. This work has now been taken in hand and steady progress has List of Ancient Monuments. been made, but it will of course take a considerable time to draw up a complete and up to date list of all the Ancient Monuments in the Northern Circle, owing to the number of sites that will have to be inspected. My Assistant Pandit Hirananda M. A. is rendering me every assistance in compiling the list and it gives me much pleasure to record here my appreciation of his valuable services.

9. I took over charge of this office from Dr. Vogel on the afternoon Departmental Notes of the 5th January 1909. No other changes have occurred during the year under report. The staff has been carrying out its work to my entire satisfaction and I have much pleasure in recording my appreciation of its services. Dr. Vogel granted one month's leave to the Assistant, one month and twenty day's leave to the clerk, a temporary clerk being appointed in his place on Rs. 30 a month, and one month's leave was granted to the photographer. There is one important change, and I believe I am correct in calling it a change, as previously to November 1908, the same difficulty does not appear to have been experienced by officers of this Department as at present, and that is the refusal of the Comptroller, India Treasuries to acknowledge the authority of Local Governments to sanction any extra or special expenditure incurred by officers of this Department without the Local Government first obtaining the sanction of the Government of India, on the grounds that the Archæological Survey Department is an Imperial one. I need hardly point out, that as all such applications have to be made through

the Local Government, this arrangement causes extra correspondence, waste of stationery and postage stamps and delay in receiving payment. Sometimes the excess expenditure is of a very trivial character. For instance during October 1908 Dr. Vogel was compelled to remove his office to another building in Lahore and the cost of removal amounted to Rs. 6-7-3 in excess of the amount fixed for office rent, so he applied to the Local Government to sanction the extra expense unavoidably incurred and of course obtained it, but the charges were objected to by the Comptroller for want of the sanction of the Government of India. In August 1908 Dr. Vogel received instructions from the Government of India through the Director General of Archaeology to prepare a complete set of estampages of all Aśoka Inscriptions in his Circle and he deputed the photographer to go on tour in Februry. 1909 and carry out the work. As many of these inscriptions are very large and at some height above ground (scaffolding in some cases having to be erected) it was found impossible for the man to do the work without an assistant. As none of the peons was available at the time to assist him owing to two of them being on tour with me leaving only one at Head-quarters, an application was made to the Local Government to sanction the extra services of a Khalāsi at Rs. 8 per month for two months and obtained. The work was completed and the estampages safely despatched and delivered but up to the present the extra expenditure incurred by this office has not been recovered for reason stated above. In order to avoid unnecessary delay in receiving prompt payment of such expenditure, I have requested the Local Government to allow me to apply to the Government of India Home Department direct in future.

The expenditure incurred during the year was as follows :—

STATEMENT OF EXPENDITURE FOR 1908-09.

SUB-HEADS.					Annual ex- penses.	Budget grant.
					Rs. A. P.	Rs. A. P.
<i>Salaries of Gazetted Officers.</i>

TOURS BY MYSELF.

In camp at Bhītargāon, Cawnpore District from the 14th January to 16th March 1909, preparing record drawings, plans and photographs of the ancient monuments in that district.

TOURS BY PT. HIRANANDA, M. A.

The Pandit has visited Sabēth Mahēth, Harappā and Shōrkōt chiefly to ascertain if certain sites at these places could be protected under the Ancient Monuments Act.

11. *Tour programme for, 1909-10:*—Besides carrying out the necessary tours of inspection in connection with the conservation of ancient monuments in this circle, I propose to tour in the Kangra District and Kulu Sub-division in order to complete the list of ancient monuments there and inspect the repairs to the temples at Nūrpur, Baijnāth and Bajaurā. Dr. Vogel has also requested me to make a complete survey and record drawings and photographs of the group of brick temples in the Fatehpur District. The listing of Ancient Monuments in the Jehlum and Shahpur Districts will also have to be brought up to date and if time permits an inspection of the ancient temples in the Salt range will be carried out. However, this programme may be subject to alteration when Dr. Vogel returns to take over charge of his office in January 1910.]

A. H. LONGHURST,

*Offg. Superintendent Archaeological Survey,
Northern Circle.*

May 1909.

APPENDIX A.

Statement showing expenditure incurred on the conservation of ancient Buddhist and Hindu monuments in my circle during the year 1908-09.

APPENDIX. B.

Acquisitions for Museums.

LAHORE MUSEUM.

1. A sculptured fragment found near Mandiān, Tahsil Dhuri, Patiala State. It appears to be the top portion of a slab carved with an image, which probably represented some Hindu deity.

2. A Stone Slab ($10'' \times 9\frac{1}{2}'' \times 2''$) with an indistinct inscription in Gurmukhī, apparently of recent date. It was noticed in Rawalpindi Bāzār by the antiquity dealer Mehr Chand.

3. A lead die purchased at Lahore and inscribed " Manak Pir Ahmad Walaiti Tari Korawa 120 San."

4. Four specimens of inscribed clay sealing found in excavation on the ancient site of Kasia, Gorakhpur District.

5. An old cannon, unearthed from one of the turrets of the old Rāmgarh Fort in the Ludhiana Tahsil.

6. Thirty-nine pieces of Gandhāra sculptures from the collection of Lord William Beresford.

7. 152 pieces of Gandhāra sculpture from Do :

8. A collection of miscellaneous old coins, transferred from the Delhi Municipal Museum.

1. No. 4 was transferred from Lucknow Museum on behalf of the Government United Provinces.

2. Nos. 6 and 7 were sent to Lahore Museum by the Director General of Archaeology in India.

CHAMBA' MUSEUM.

A.—STONE INSCRIPTIONS.

1. Sarāhan inscription of Sātyaki, the son of Bhogaṭa; 9th or 10th century A.D.
2. Tūr image inscription of the reign of Raja Vidagdha; 10th century A.D.
3. Tūr image inscription of the reign of Raja Dodaka; 10th century A. D.
4. Tūr image of Pārvatī.
5. Bhākund fountain inscription of the reign of Trailokyadeva; probably A. D. 1028-9.
6. Dadvār fountain inscription of the reign of Trailokyadeva; probably A. D. 1041.
7. Bāṇotā fountain inscription of the reign of Raja Soma-varman; 11th century A. D.
8. Lōh Tikī fountain inscription of the reign of Rājā Jāsata; A. D. 1114.
9. Devī Kōṭhī statuette of Nārāyaṇa, of the reign of Raja Lalita-varman; 12th century A. D.
10. Devī Kōṭhī fountain inscription of the reign of Raja Lalita-varman; A. D. 1159-60.
11. Devī Kōṭhī fountain inscription.
12. Baṭrūṇḍī " "
13. Mangalōa " "
14. Sīyā Dadhār " "
15. Bhaṭkāra " "
16. Sukoi " "
17. Nāl " "
18. Chambā fountain slab.
- 19-27. Luḍu " slabs.
28. Bāṇotā " slab.
29. Dhundh " "
30. Dyól inscription of Raja Udai Singh.
31. Salūṇī inscription.
32. Dhundh fountain inscription.
33. Stone goose from Raṇhūn Kōṭhī.
34. Guggā image from Jagatī.
35. Viṣṇu image from Svāim.

B.—COPPER INSCRIPTIONS.

1. Copper-plate (1'1½" × 8¼") issued by Yugākara-varman, the son of Sāhilla-varman, in the 10th year of his reign (about A. D. 950). It records a grant of land to the temple of Narsingh at Brahmapura (Brahmor), the ancient capital of the State. Present owner Mutalvi, *pūjārī* of the Narsingh temple.

2. Copper-plate (1'5" × 1'1") issued by Vidagdha, the son of Yugākara-varman, in the 4th year of his reign (about A. D. 964). It records a grant of land at Sumāṅgala, now Saṅgal, to a Brahman named Nandu (ka). Present owners Dīdō, Dēvīdyāl etc.: Brahmans at Saṅgal, *parganā* Gudyāl, who still enjoy the grant.

3. Copper-plate (10½" × 6") alleged to have been issued by Vidagdha but in reality a forgery of the Muhammadan period. It was probably copied from a genuine document. It records a grant of land to a Brahman at the village of Sai, *parganā* Gudyāl, and is now in possession of Byaja a Brahman resident of the said village.

4. Copper-plate (1'2¾" × 10¾") issued by Soma-varman, the son of Sālvāhana, in the 7th year of his reign (about A. D. 1067) on the occasion of a solar eclipse. It records a grant of land at Kulikagoshtha, now Kulait, in the *parganā* of Trighaṭṭaka, modern Tréhtā, in the upper Rāvi valley. This as well as the next plate (No. 5) contain an extensive eulogy in praise of Sāhilla the founder of Chambā town and extolls his victories over the Kīras, the Saumatikas and the ruler of Durgara i.e. Dugar, the country of the Dogrās. The document mentions the name of the Rāṇās Rīhila and Kāhila who held the offices of Prime-Minister and Great-Recordkeeper respectively. Present owners Thaluman, Jaugi etc. Brahmans and *Pūjārīs* of the Kārtikasvāmi temple at Kulait, who still possess the land.

5. Copper-plate (1'6" × 1') granted by Somavarman and issued by his brother and successor Asata in the first year of the latter's reign (about A. D. 1080). It records a grant of lands situated in various villages round Chambā town to the temples of Vishṇu and Śiva and mentions the ancient names of the *parganās* adjoining the capital. The document contains the same eulogy on Sāhilla which is found in No. 4 and mentions in addition a victory reported by that ruler over the Tarashkas (Turks) i.e., the Muhammadans. The plate belongs now to the temples of Champāvati and Hari Rāi in Chamba City which enjoy the grant.

6. Copper-plate (1'1¼" × 9¼") issued by Asata, the son of Sālvāhana, in the 5th year of his reign (about A. D. 1085). It records a grant of land in the Bhāṭṭāraka *parganā* to a Brahman named Macha. Present owner Jasu Brahman at Thundhu-Mundhu *parganās* Gudyāl.

7. Copper-plate (10" × 8") issued by Vairāsi-varman in Śāstra samvat 1337 (A. D. 1330). It records a grant of land at the village of Gurōti, *parganā* Gudhyāl. Present owner Lōchā and other Brahmans at the said village:

NOTE.—Inscriptions Nos. 1-2 and 4-6 have been preliminarily edited in the Annual Report of the Archaeological Survey for 1902-3, pp. 244-271.

8. Copper-plate ($7\frac{1}{2}'' \times 6''$) issued by Bhoṭa-varman in Śāstra-samvat 73, Śaka-samvat 1318 (A. D. 1396.) It records a grant of land at the village of Bhaisā ? now Mhesa, *parganā* Lihl, now Lilh. Present owner Manga, Ghiku and other Brahmins at Mhesa.

9. Copper-plate ($10\frac{1}{4}'' \times 8''$) issued by Bhoṭa-varman the son of Mānikya-varman ; no date. It records a grant of land at the village of Jungurāra, now Jhungarār, in Chaturāha, now Churāh. Present owner Chanaṇ a Brahmin resident of the said village.

10. Copper-plate ($11'' \times 5\frac{1}{2}''$) issued by Samgrāma-varman in Śaka-samvat 1316, Śāstra-samvat 70 (A. D. 1395). It records a grant of land belonging to a Brahmin named Gokal in the Bakāṇ *parganā*. The plate is broken in two and completely burnt.

11. Copper-plate ($12\frac{1}{2}'' \times 6\frac{1}{2}''$) issued by Samgrāma-varman ; no date. The last owner was a Brahmin, Śiv Karṇ by name, in the village Miṇḍha, *parganā* Panjata. On his death the grant lapses.

12. Copper-plate issued by Ananda-varman in Śaka-samvat 1403, Śāstra-samvat 57 (A. D. 1481). It records a grant of land at Uham, *parganā* Molha and belongs to a Brahmin, named Atrā, a resident of that village.

13. Copper-plate ($5\frac{3}{8}'' \times 4\frac{1}{4}''$) issued by Gaṇeśa-varman in Śāstra-samvat 88, Śaka-samvat 1434 (A. D. 1512). It records a grant of land at the village of Ghureṭha, *parganā* Bhaṛiyā and belongs to a Brahmin named Gharathu Prabhdyaḷ.

14. Copper-plate ($12\frac{1}{2}'' \times 8\frac{1}{2}''$) issued in the reign of Gaṇeśa-varman by his son and co-regent Pratāp Singh in Śāstra-samvat 341 (A. D. 1558) on occasion of a pilgrimage to Badri Nāth and Kedār Nāth. It records a grant of land at the village Chahnya now Chuhn in Bhaṭṭi and belongs to the temple of Lakṣmī-Nārāyaṇa in Chambā City.

15. Copper-plate ($10'' \times 6\frac{1}{2}''$) issued by Gaṇeśa-varman and his son and co-regent Pratāp Singh in Śāstra-samvat 34 (A. D. 1558). It records a grant of land to a Brahmin in the village of Mohḍayā, *parganā* Habārā in Bhaṭṭi and belongs to Jyōtiṣhī Chandramaṇī.

16. Copper-plate ($11'' \times 8\frac{1}{4}''$) issued by Bahādur Singh of Kuḷṭ in Śāstra-samvat 35 (A. D. 1559) on the occasion of the marriage of his three daughters Sunu, Gaṅgā and Rāṇjo. It records a grant of land at the village Hāṭ near Bajaurā and other localities in Kuḷṭ. The grantee was Pandit Ramāpati the son of Pandit Surānand and guru to the Raja of Chambā. The plate is now in possession of the present Rājaguru Pandit Mohan Lāl, who is descendant of the original donee. The inscription was edited in the *Annual Report of the Archaeological Survey* for 1903-4, pp. 261-269 with a facsimile.

17. Copper-plate ($1'3'' \times 9\frac{1}{4}''$) issued by Pratāp Singh in Śāstra-samvat 51 (A. D. 1575) on the occasion of the hibernal solstice or Makara-sankrānti. It records a grant of land to a Brahmin at the village of Khnanā *parganā* Bhaṛiyā, and belongs to the temple of Lakṣmī-Nārāyaṇa in Chambā City.

18. Copper-plate (1' x 10") issued by Pratāp Singh in Śāstra-samvat 51 (A. D. 1575) on the occasion of the hibernal Solstice or Makara-sankrānti. It records a grant of land to a Brahman at the village of Thanāṣ, *parganā* Bhaṛiyā, and belongs to the temple of Lakshmi-Nārāyaṇa in Chamba City.

19. Copper-plate (1' x 7½") issued by Pratāp Singh in Śāstra-samvat 62 (A. D. 1586). It records a grant of land to a Brahman and belongs to the Purōhit Barū Dīdō.

20. Copper-plate (1'2" x 11") issued by Balabhadra the son of Virabhāna and grandson of Pratāp Singh in Śāstra-samvat 65 Vikrama-samvat 1646 (A. D. 1589). No less than forty-two copper-plates of this Raja are known, of which the present one) is the earliest in date. It records a grant of land to the Raja's guru Ramāpati Pūrṇanand and is in possession of the present Rājaguru Pandit Mōhan Lāl.

21. Copper-plate (1'3" x 10½") issued by Balabhadra in Śāstra-samvat 68, Vikrama-samvat 1649 (A. D. 1592). It records a grant of land at the village Kōṭlā, *parganā* Sāhō, and belongs to the temple of Lakshmi-Nārāyaṇa.

22. Copper-plate (1'6" x 8½") issued by Balabhadra in Śāstra-samvat 75, Vikrama-samvat 1656 (A. D. 1599). It records the appointment of the Brahman Ívara as the Raja's family priest and is now in possession of the donee's descendant Purōhit Mansā.

23. Copper-plate (1' x 8½") issued by Balabhadra in Śāstra-samvat 83, Vikrama-samvat 1664 (A. D. 1607). It records a grant of land to a Brahman at the village-Para, *parganā* Sāhō, and belongs to the temple of Lakshmi-Nārāyaṇa.

24. Copper-plate (1'½" x 10") issued in the reign of Balabhadra by his son the heir-apparent Janārdan in Śāstra-samvat 89, Vikrama-samvat 1690 (read 1670) (A. D. 1613). It records a grant of land at the village Maṅgalōr, now Maṅgrol, *parganā* Sāhō, and belongs to Gópāla Sanju.

25. Copper-plate (9½" x 8") issued by Balabhadra in Śāstra-samvat 3, Vikrama-samvat 1686 (A. D. 1629). It records a grant of land to a Brahman in the village Midaghā, *parganā* Chūah, and belongs to the temple of Lakshmi Nārāyaṇa.

26. Copper-plate (9½" x 6½") issued by Balabhadra in Śāstra-samvat 7, Vikrama-samvat 1688 (A. D. 1631). It records a grant of land at the village Lāhrā, *parganā* Bhaṭṭi-Tikri and belongs to the State.

27. Copper-plate (10" x 5") issued by Balabhadra in Śāstra-samvat 8, Vikrama-samvat 1693 (read 1689), (A. D. 1632). It records a grant of land at the village Panjyārā, and belongs to Chhunphanān, Porhi, Maṅgnu and others.

28. Copper-plate (9½" x 8½") issued in the reign of Balabhadra in Śāstra-samvat 12, Vikrama-samvat 1693 (A.D. 1636) by his son Mān Singh. It records a grant of land to a Brahman at the village Gadōd, *parganā* Jasor, and belongs to the temple of Lakshmi-Nārāyaṇa.

29. Copper-plate ($1'1'' \times 10\frac{1}{4}''$) issued by Balabhadra in Śāstra-samvat 16 Vikrama-samvat 1697 (A. D. 1640). It records a grant of land to the Raja's cook at the village Kumbārō, *parganā* Sāhō and belongs to the temple of Lakshmi-Nārāyaṇa. It is the last but one plate of Balabhadra.

30. Copper-plate ($9'' \times 7\frac{1}{2}''$) issued by Prithvi Singh in Śāstra-samvat 17, Vikrama-samvat 1698 (A. D. 1641). It records a grant of land of Chāmunda Dēvī at Mindhal in Pāngī and is still the property of that shrine.

31. Copper-plate ($10\frac{3}{4}'' \times 7\frac{3}{8}''$) issued in the reign of Prithvi Singh in Śāstra-samvat 21, Vikrama-samvat 17 [o]2 (A. D. 1644). It records a grant of land by the Raja's wetnurse Dāi Baṭulā at the village Bhujalā, *parganā* Bakāṇ and belongs to Nikā Sibānotor.

32. Copper-plate ($7\frac{1}{2}'' \times 6\frac{1}{2}''$) issued in the reign of Prithvi Singh in Śāstra-samvat 21, Vikrama-samvat 17 [o]2 (A. D. 1645-6). It records a grant of land by the Raja's wetnurse Dāi Baṭulā at the village Sarāhan, *parganā* Sāhō, and belongs to the Brahman Magnā a resident of that village.

33. Copper-plate ($11\frac{1}{4}'' \times 10''$) issued by Prithvi Singh in Śāstra-samvat 21, Vikrama-samvat 1702 (A. D. 1646). It records a grant of land at the village Gaila, *parganā* Nadha (now Rājnagar), and belongs to the temple of Lakshmi-Nārāyaṇa.

34. Copper-plate ($10'' \times 8\frac{1}{2}''$) issued by Chhattar Singh (hero-collod Śātra-simha) in the 15th year of his reign or Śāstra-samvat 54, Vikrama-samvat 1734 (A. D. 1678). It records a grant of land to a Gōsāin at the village Samoṭ, *parganā* Dyuhṛ, and belongs to the temple of Lakshmi-Nārāyaṇa.

35. Copper-plate ($1'4\frac{3}{4}'' \times 8\frac{1}{4}''$) issued by Amrit Pāl, Raja of Basohli (1) on the occasion of his invasion in Chambā territory. It is dated Vikrama-samvat 1831, Śaka-samvat 1696 (A. D. 1774) and records a grant of land at the village Surdānī (?), *parganā* Dīhur or Dyuhṛ. It belongs to Jyotishī Chandramani.

36. Copper-plate ($10\frac{3}{8}'' \times 6\frac{3}{8}''$) dated from Nadaun in Kangra, Vikrama-samvat 1845 (A. D. 1788) and records a treaty between Rāj Singh of Chambā and Sansār Chand Katoch of Kangra. It belongs to the State.

(1). He possesses a portrait of this Raja.

List showing the Buddhist and Hindu Monuments which have been declared protected under the Ancient Monuments Preservation Act during the year 1908-09.

Provinces.	District.	Particulars of Site.	Protected by.
UNITED PROVINCES.	Benares District.	The site containing all the ancient monuments on the Buddhist site of Sarnāth in the Benares District.	Notification No. <u>1923-m</u> <u>367</u> dated 8th Sept. 1908.
	Cawnpore District.	The site of ancient brick temple at Bhitargāon together with the whole area of land within its compound wall in Tahsil Narwal.	Notification No. <u>1928-m</u> <u>367</u> dated 8th September 1908.
		The site of temple at Mauza Parauli known as "Mahādeo Bābā" together with a strip of land three yards wide around the said site in Tahsil Narwal.	
		The site of temple at Mauza Bihpur near Mauza Rār, known as "Phulmatī Devī" together with a strip of land 2 yards wide on the east side and 3 yards wide on the other three sides of the temple site in Tahsil Ghatampur.	
		The site of temple at Mauza Simbhūā together with a strip of land 3 yards wide around the plinth of the temple in Tahsil Cawnpore.	
	Fatehpur District.	The site of one temple at Mauza Tindauli together with whole area of land situated within 100 yards of the site in <i>parganā</i> Bindki.	
		The site of one temple at Mauza Bahuā together with whole area of land situated within 100 yds. of the site in <i>parganā</i> Gazipur.	
		The site of 4 temples at Mauza Kurasi 2 miles North of Bahuā together with whole area of land situated within 100 yards of the site in <i>parganā</i> Gazipur.	
		The site of two temples at Mauza Thithaurā together with whole area of land situated within 100 yards of the site in <i>parganā</i> Fatehpur.	
		The site of one ruined temple at Saton 4 miles from Bahrapur together with whole area of land situated within 100 yards of the site in <i>parganā</i> Fatehpur.	

NOTES ON MUSEUMS BY DR. VOGEL.

—: o :—

Most of my time in Chambā was spent in arranging the new State Museum which was opened on the 24th September 1908. by the Honourable Mr. R. E. Younghusband C, S. I. Commissioner of Lahore and at his proposal named after His Highness Rājā Sir Bhuri Singh, K. C. S. I.-C. I. E. The institution being placed in charge of Captain S. K. Barotru as Honorary Curator. The collection contains stone and copper-plate inscriptions, wood-carving, Indian pictures, portraits and ancient armour.

The Delhi Museum of Archæology was opened to the public in January 1909. I arranged the collection in co-operation with Mr. Tucker, who obtained a valuable collection of pictures by purchase.

I spent the month of November in re-arranging the Mathurā Municipal Museum with the assistance of Pandit Radha Krishna. The Museum was inspected by the Director General of Archæology and in consultation with him I have submitted fresh proposals for the improvement of the building to the Municipal Board. In the course of the year the collection has considerably been extended owing the funds placed at the disposal of the Pandit by the Director General of Archæology.

The cataloguing of the Lucknow Provincial Museum was taken in hand by Babu R. D. Banerji in November and much progress has been made since. The work will probably be finished before the end of the official year. Owing to the want of space and light to which I have repeatedly called attention, it is impossible to display the archæological exhibits adequately.

Finally I may mention that in the course of the year under review Mr. Percy Brown has published a guide to the archæological section of the Lahore Museum, which will be of much use in rendering the section more intelligible to and better appreciated by the public.

PUBLICATIONS.

By Dr. Vogel.

In the course of the year under review I have completed the first volume of my "Antiquities of Chambā State" which deals with fifty inscriptions of the Pre-Muhammadan period and will be illustrated with forty plates and thirty text-illustrations. These have all been reproduced by Messrs Griggs and Sons, London, and the work itself is being printed at the Government Press, Calcutta.

In co-operation with Mr. Tucker and his Assistant Maulvi Muhammad Shuaib I have compiled a catalogue of the Delhi Museum of Archæology which was printed at the Baptist Mission Press, Calcutta and was available to the public in the beginning of January. It consists of a catalogue proper and a second part dealing with the inscriptions and other documents in Arabic, Persian, Sanskrit, Hindi and Armenian.

My catalogue of sculptures and inscriptions in the Mathurā Museum is being printed at the United Provinces Government Press, Allahabad, and twenty five plates of illustrations have been sent to Messrs. Griggs and Sons, London, for reproduction. A catalogue of the newly founded Chambā State Museum is also in the Press and, will-it is hoped-shortly appear. The collection of coloured drawings relating to tile-mosaics on the Lahore Fort have been despatched to London.

REPORTS AND CATALOGUES.

Antiquities of Chambā State. Vol. 1. Inscriptions of the Pre-Muhammadan period. Report of the Archaeological Survey of India New Imperial Series. With forty plates and thirty text-illustrations. (In the Press).

Tile Mosaics of the Lahore Fort. Report of the Archaeological Survey of India. New Imperial Series. With colour reproductions of one hundred and fifteen figured panels and elevation showing their position on the Fort wall.

Excavations of Kasia. Report of the Archaeological Survey of India. New Imperial Series.

Catalogue of the Delhi Museum of Archaeology Calcutta, Baptist Mission Press, 1903 (Price Re. 1).

Catalogus of the Bhuri Singh Museum (Chambā State) Calcutta, Baptist Mission Press. (In the Press).

Catalogue of sculptures and inscriptions preserved in the Municipal Museum at Mathurā. With twenty-five plates. (In the Press).

Catalogue of the Archaeological Collections preserved in the Provincial Museum at Lucknow, by Babu R. D. Banerji (In the course of preparation).

Catalogue of Græco-Buddhist Sculptures preserved in the Central Museum at Lahore.

Proceedings of the Hon'ble the Lieutenant Governor of the Panjab in the Public works Department, Buildings and Roads Branch, No. 470-G. S., dated 13th August 1910.

Read. Progress Report of the Superintendent Archaeological Survey, Buddhist and Hindu Monuments, Northern Circle, for the year ended 31st March 1910.

Remarks. *Para 2 Preservation of Monuments.* His Honour the Lieutenant Governor is glad to see that the temples at Baijnath and Jagat-sukh in Kulu to which he drew attention in 1884, still receive proper care.

Para 3. Protection of Monuments. It is necessary to move in such matters with care, and when the persons directly interested in the monuments which often possess a religious or semi-religious character, object to protection, it is undesirable to press them too much at once. In time they may come to see reason.

Para 4. List of ancient monuments. The List of ancient Monuments in the Panjab should be an interesting and useful document.

Para 7. Museum. At the Delhi Divisional Darbar in February 1910, His Honour the Lieutenant Governor drew special attention to the interesting collection which had been placed in the Naubat Khana Museum, and he invited all those who possessed or knew of the existence of similar relics to give or lend these, and generally to co-operate with Government in the work of preserving and recording the history of ancient monuments of the districts in which they lived. The appeal has already produced some results, and more may be accomplished by such co-operations.

Para 8. Publications. The proposals for the publication of plates relating to tile mosaics in Lahore Fort are entirely satisfactory.

The Local Government is indebted to the Archaeological Department for advice and assistance in the work of preserving the Panjab Ancient monuments, but it will be well if the officers of the Department try to enlist the active sympathy of the district officers who can do a great deal to help them if approached directly.

Order. Ordered that a copy of the report and of the above remarks be submitted to the Government of India in the Home Department, and that copies of the same be distributed to the Chief Secretary to Government, Punjab, the Director General of Archaeology in India, the Superintendent

Archæological Survey, Muhammadan and British Monuments, the Superintendent Archæological Survey, Buddhist and Hindu Monuments, Commissioners, Deputy Commissioners, Superintending and Executive Engineers and Officers and Institutions named in the List circulated with Government of India Department of Revenue and Agriculture Circular No. 5-24 dated 31st January 1902.

By order of the Hon'ble the Lieutenant Governor.

F. ST. G. MANNERS-SMITH,

Offg. Secretary to Government, Punjab.

ANNUAL PROGRESS REPORT.

PART I.

DEPARTMENTAL NOTES.

1. Mr. A. H. Longhurst continued officiating for me till the 24th November when he returned to Calcutta where, owing to the sudden death of Dr. T. Bloch, he had been appointed to officiate as Superintendent of the Eastern Circle. From that date Pandit Hirananda was in charge of the office till the Christmas recess, after which I returned to duty on the 3rd January 1910. Mr. Longhurst made an extensive tour in the Kāngrā district, including the Kulū sub-division, during the summer months from 21st April till 15th November. Since my return to duty I have visited Delhi (January 26th-February 2nd; 8 days), Mathurā (February 3rd-22nd; 20 days), Hathras (February 23rd; 1 day), Aligarh (February 24th-25th; 2 days), Lucknow (February 26th-March 7th and March 9th-11th; 13 days); Benares (March 8th; 1 day); and Amritsar (March 12th-13th; 2 days).

2. Among the works of preservation in the Panjāb I may mention the dismantling of the top portion of the Sidhnāth temple at Baijnāth (Kāngrā District) at a cost of Rs. 19. It will be remembered that both the Baijnāth and Sidhnāth temples were considerably damaged in the earthquake of 4th April 1905. Regarding the temple of Bashōshar Mahādēv at Bajaurā and the small Śiva temple at the back of Sandhyā Dēvī at Jagatsukh, both in the Kulū sub-division, certain proposals have been made by Mr. Longhurst in his Conservation Notes, dated July 1909. Estimates for these repairs amounting to Rs. 463 and Rs. 72 respectively, have since been received in this office.

The brick temple of Bhītargāon in the Cawnpur District was included in Mr. Longhurst's Conservation Notes and an estimate prepared amounting

to Rs. 3,023, of which Rs. 1,106 have been spent during the year under report. The work is still in progress.

In the course of my stay at Mathurā I paid a visit to the temple of Hari Dēv at Gōbardhan which is of the same mixed Hindu-Mughal style as the five ancient temples of Brindāban. The Hari Dēv temple is in great want of repairs and I have made it the subject of a Conservation Note which is now in the press.

3. In a letter dated the 9th March 1907 I proposed that some of the most important Buddhist and Brahmanical monuments in the Panjāb should be declared 'protected' under the provisions of the Ancient Monuments, Preservation Act (VII of 1904). In several instances, however, my proposal was objected to by District Officers, mainly on account of suspicions which such a measure was likely to arouse. It is true that every new measure is looked on by the rural population with distrust, but it occurs to me that in the present instance perhaps too much weight has been attached to such apprehensions in view of the importance of protecting ancient historical monuments against wilful damage. As a result of my proposal, twenty-four ancient monuments have been declared 'protected' by Government Notification No. 849 dated the 9th December 1909. A list of them will be given beneath. The preliminary notification was not confirmed with regard to six monuments, including the ancient site of Taxila, on which a further report has been called for.

In the United Provinces four more Buddhist and Brahmanical monuments have been declared 'protected,' a list of which will be found beneath.

4. The preparation of a list of ancient monuments for the Panjāb has now been taken in hand on the lines laid down by the Director-General of Archæology in his letter No. 1841 of 6th October 1909 to the Panjāb Government. According to the new scheme, the list will contain every monument, ancient site or other archæological relic with "a full account of their history and the legends connected with them, their architectural and artistic features, their inscriptions, their present condition and the measures necessary to secure their safety." "The monuments will be dealt with according to their geographical distribution and an archæological map of each district will be added with full bibliographical references, photographic illustrations and a complete index." "Besides giving a full account of each individual

monument, it is proposed also to preface the volumes with general chapters dealing respectively with the history, topography, art, architecture and numismatics of the province, and thus to make the work a complete compendium of all branches of archæology." The Director General intends editing the materials collected by the provincial archæological officers, to which he proposes to make as many original contributions as circumstances will allow.

The district officers have been asked to supply preliminary lists, two of which have now reached my office, one for the Rāwal-Pindī District containing six, and the other for Miānwālī containing twelve monuments, the majority of which are Muhammadan. The work done by my office in this matter has been confined to making out a provisional list of ancient monuments in the Kāngrā district, mainly based on notes made by me in the course of my tours in the district. It is well known that, as regards Brahmanical antiquities, the Kāngrā district is one of the most important of the Province. The preliminary list now drawn up by Pandit Hirananda comprises more than one hundred items. As, however, my notes do not in every instance supply the full information, historical, legendary, descriptive etc., required for the proposed publication, a personal inspection of most of the monuments will be required.

5. In the way of explorations little was done in the year under review, as after my return to duty my time was mostly
 Explorations. taken up by museum work and publications. It was, therefore, impossible to undertake any excavation, but I have made proposals to the Government regarding the exploration of the Mōrā site which will more fully be noticed in the second part of this report. The discoveries made by Pandit Radha Krishna at Mathurā will also be discussed in the second part. I may mention here that the Director General of Archæology has carried on excavations at Bhūtā in the Allahabad District.

6. In the neighbourhood of Mathurā several more inscriptions have
 Epigraphy. been secured for the local museum by Pandit Radha Krishna. Most of them are unfortunately in a more or less fragmentary state, so that their chief interest lies in the approximate date which they supply for the sculptures on which they are engraved. The great majority belong to the Kushana period which, as we know, was the great flourishing period of the Mathurā school of sculpture. More particularly it seems to have been the reign of Huvishka, whose name is found on several of the newly discovered inscriptions.

7. With regard to museums, the year under review has been one of considerable progress in the United Provinces. The
Museums. Provincial Museum at Lucknow which was hitherto badly housed in the Lāl Bārādārī and Gulistān-i-Eram buildings, will now be transferred to the former Canning College building which the Local Government has purchased for the sum of Rs. 2,10,000.

The new building is favourably situated in the Kaisar Bāgh and is well suited for the purpose of a museum. While staying at Lucknow, I have advised the Museum Committee on the manner in which the different sections could be best distributed over the new building.

The new museum at Sārṇāth is now nearly completed, except for some decorative details. I visited the place on the 3th March and arranged with the Executive Engineer about the sculpture stands, so that it will soon be possible to remove the sculptures and inscriptions into the new building. As regards the sculpture hall built by Mr. Oertel at the time of his Sārṇāth excavations, it occurs to me that it should be dismantled and re-erected at Benares to be used for Brahmanical sculptures. To start with there is, a number of such sculptures which some years ago were removed to Sārṇāth but have no connection with the place. These sculptures came from Queen's College, where apparently they had been collected by Major Kittoe.

Extensive repairs have been carried out to the Municipal Museum at Mathurā so as to provide more space and light. The cost of these repairs has been estimated at Rs. 4,000, to which the Government of India have given a grant of Rs. 2,000 on the understanding that an equal sum should be found locally. Up to the present only the sum of Rs. 2,000 granted by the Government of India has been spent, the Municipality having declared themselves unable to provide the remainder. As the repairs were carried out under the supervision of Pandit Radha Krishna, the cost proved to be less than was first estimated. Yet a considerable part of the proposed work has had to be abandoned for lack of funds.

Finally I may mention under this section that the trustees of the M. A. O. College at Aligarh intend establishing a museum at that place also.

8. In the course of the year the Government of India have sanctioned the publication of the seventy-six plates containing
Publications. one hundred and sixteen drawings relating to tile-mosaics on the Lahore Fort. It has been decided that the plates will be preliminarily

published in the Journal of Indian Art and afterwards as a Report of the Archaeological Survey. They will appear in five continuous numbers of the Journal, each number containing an average of fifteen plates, seven in colour and eight in outline. In the final volume they will all be reproduced in full colours. The cost of publication which has been entrusted to Messrs W. Griggs and Sons, the well-known lithographers and publishers of the Indian Art Journal, has been estimated at £. 550. The final volume will appear in 350 copies.

My Report on Antiquities of Chambā State is now being printed at the Government of India Press, Calcutta. It will appear as Volume XXXVI of the New Imperial Series of Archaeological Survey Reports and will comprise an Introduction (136 pages), texts and translations of fifty inscriptions (113 pages) and four appendices. The illustrations consisting of forty plates (including an archaeological map) and thirty text illustrations have been reproduced by Messrs. W. Griggs & Sons, London. It is hoped that the work will appear in the course of the next year.

A Catalogue of sculptures in the Municipal Museum, Mathurā, is being printed at the Government Press, Allahabad. It will be illustrated with twenty-five plates which have also been reproduced by Messrs W. Griggs & Sons. Finally I may mention a Catalogue of the Bhuri Singh Museum, Chambā, with five plates. Both these catalogues ought to be available to the public within a few months.

9. No changes in my establishment are to be recorded. The second draftsman was on leave for three months. The Establishment. Pandit accompanied Mr. Longhurst on his tour in Kāngrā and was further mostly engaged in compiling a preliminary list of ancient monuments in that district. My draftsmen have prepared nine architectural drawings mostly relating to temples in Kāngrā and Kulū. A list will be found beneath. They have, moreover, finished fourteen drawings in ink and colour. These include an enlarged copy of a map of the city of Delhi. The original which is preserved in the Delhi Museum of Archaeology (Cat. No. K, 2) was probably made in the reign of Akbar II and is of great interest for the period preceding the Mutiny. It is remarkably full as regards topographical names, which in the original map are written in Persian, but on the enlarged copy have been either transcribed into Roman or translated into English.

My photographer has taken photographs including a set relating to

the ancient fort and temples of Garhwā (Allahabad district,) which were prepared at the suggestion of Mr. F. O. Oertel Superintending Engineer.

10. It has been decided that I shall officiate as Director General of Archæology for one year and seven months, during
 Tour programme which Mr. J. H. Marshall will be absent on leave.
 1910-11. Pandit Hirananda will be in charge of the current duties of my office, whereas questions relating to the conservation of monuments will be disposed of by Mr. R. F. Tucker, Archæological Surveyor, Northern Circle. I am leaving instructions that the Pandit should proceed on tour to Kāngrā and complete the list of ancient monuments for that district, including the Kulū Sub-Division. It is hoped that the Rev. Mr. A. H. Francke of the Moravian Mission will assist us in supplying a list of monuments in Lahul and Spiti. The Pandit will be able to visit Mandi State on his way to Kulū and perhaps Sukēt also. My work on the Antiquities of Chambā will contain most of the information required for that State. It will, therefore, be possible to obtain a complete list of ancient monuments for the Kāngrā district, including the Kulū Sub-division and the Native States of Chambā, Mandi and Sukēt. I have instructed my draftsmen to copy some of the drawings relating to excavations at Kasiā and Sahēth-Mahēth with a view of exhibiting these copies in the Lucknow Museum in connection with the objects discovered in the course of those explorations.

PART II.

Whatever progress has been made with regard to explorations and epigraphy is almost entirely due to Pandit Radha Krishna who has continued his labours on behalf of the Mathurā Museum with undiminished enthusiasm. With the liberal support of the Government of India the Pandit has been able to acquire again a considerable number of sculptures of great archæological interest, a complete list of which will be found beneath.

Earliest in date are two fragments of a colossal statue (ht. 4' 2" and 2' 5"), which were obtained from the village of Barōda 4 miles from Parkham and 2 miles from Chhargaoon. The early date of those fragments may be inferred from their great similarity to the well-known Parkham statue, now in the Mathurā Museum, which bears an inscription in Maurya Brāhmī. The Barōda figure, when entire, must have exceeded the Parkham one and can have been hardly less than double life-size.

Additional proof of the prevalence of Nāga worship in ancient Mathurā is afforded by an inscribed statuette which was being worshipped as Dāu-jī (*i. e.*, Baldēv) in a temple in the city of Mathurā, but undoubtedly represents a Nāga. The inscription, which is dated in the year 52, shows that the statuette was made during the reign of Huvishka and is only twelve years posterior to the Nāga statue of Chhargaoon which was set up in the year 40 and in the reign of the same king. This is particularly interesting as the Chhargaoon Nāga is very superior in workmanship and style to the statuette in question.

The inscriptions found on the acquired sculptures are mostly fragmentary. Nearly all of them are written in Brāhmī of the Kushana period, the time when the Mathurā school of sculpture flourished. More particularly may we consider the reign of Huvishka as the great flourishing period of Mathurā art. Among the nine newly recovered epigraphs of the Kushana period no less than six may be assigned to the reign of that monarch, and three of these actually contain his name.

The sculptures collected by Pandit Radha Krishna also bear out that side by side with Buddhism and Jainism there flourished in ancient Mathurā

the popular cults of the Nāgas and Yakshas. Nāga worship particularly must have been very prevalent, considering the great number of Nāga images, all of which are now-a-days adored as Dāu-jī or Baldēv. The Nāgas were supposed to reside in rivers, springs, lakes, ponds and tanks and to possess power to yield rain. This explains why they were so extensively worshipped by the agricultural population of India. The Yakshas, like the dwarfs of old German mythology, were regarded as keepers of treasure, and Kubēra, the god of wealth, was their chief. Among the sculptures found in the Mathurā district there are numerous statuettes of a corpulent deity who may be identified with Kubēra or Vaiśravaṇa. Sometimes he is accompanied by a female figure holding a child. Sculptures of the latter type remind us of the well-known groups of Kubēra and Hārītī, which have been found in the Peshāwar district. Images of the goddess of fertility occur also at Mathurā. I may mention an interesting sculpture (ht. 2' 8") obtained from the village of Tāyāpur, 2 miles north of Mathurā, on the road to Rāyā. It represents a female deity seated with an infant in her lap and four children between her feet. The pedestal is curved with a group of children at play. There can be little doubt that there exists a close connection between this sculpture and effigies of Hārītī, the goddess of fertility and queen of the Yakshas. The villagers of Tāyāpur worshipped the image as Gāndhārī, the mother of the Kauravas!

Another sculpture of considerable interest is a stone slab (ht. 2' 9") with a figure of Sūrya, the Sun-god, seated on his chariot. The special point of interest is the number of the horses. In Brahmanical iconography the number is always seven, corresponding to that of the days of the week. But on a railing pillar of Bōdh-Gayā and also on a Gandhāra sculpture in the Calcutta Museum (No. G-55) we find Sūrya's chariot drawn by four horses (1). This need not be necessarily ascribed to Greek influence, as it appears from Hiuen Tsiang's account that the war chariots of ancient India were actually drawn by four horses abreast (2). On the Mathurā sculpture the number of horses is four, so that in this respect also we find a close relationship between Mathurā and the old schools.

The discovery of this interesting sculpture is due to Pandit Ram Chand, Head Clerk in the Collector's office, who presented it to the Museum together with several other pieces.

(1) Foucher, *L'art gréco-bouddhique du Gandhāra* pp. 206 f; figs 82 and 83.

(2) Si-yu-ki (transl. Beal) Vol. I p. 83.

In the course of my stay at Mathurā I had an opportunity to visit the site of Mōrā, 7 miles west of the city and north of the road to Gōvardhan. This site has yielded the famous Mōrā slab inscription which contains the name of the Great-Satrap Rājūvula (1). Unfortunately this inscription was already partly defaced at the time of its discovery by General Cunningham, and since then it has become still more obliterated. It is now preserved in the Mathurā Museum. On my visit to Mōrā I noticed the remains of a building, probably a temple, constructed of very large bricks. Round about were considerable fragments of images in the style of the Kushāna period. They appear to belong to four standing figures, three male and one female. It has occurred to me that this discovery may be connected with the mention of "images of the five heroes" (*pañcha vīrānām pratimā*) in the Mōrā inscription. "The five heroes" are probably the five sons of Pāṇḍu, and it is plausible that the fragments have belonged to the images mentioned in the inscription. If this identification is correct, we may further assume that the female image represents Draupadī, the spouse of the five Pāṇḍava brothers.

The discovery of images of the five Pāṇḍava heroes belonging to the Kushāna period would on itself be a find of considerable archaeological interest. There is yet another historical question to be mentioned. The inscription on the female image is unfortunately incomplete, but we can still trace the name of Huvishka, in whose reign it was apparently dated. The slab inscription contains, as we know, the name of the Great-Satrap Rājūvula, or properly speaking it mentions the son of Rājūvula. If indeed these two inscriptions are contemporaneous, it would follow that Rājūvula and his son were not independent rulers of Mathurā, but were governors under the Kushāna king Huvishka. This conclusion would not only be supported by the palaeographical evidence of the two inscriptions in question, but would find a parallel in the Sārnāth Bōdhisattva inscription, in which two satraps are mentioned, the Great-Satrap Vanashpara and the Satrap Kharapallāna, who evidently were deputies of King Kanishka, in the third year of whose reign the epigraph is dated.

In view of the importance of the questions involved, it is my intention

(1) Cf. Cunningham, A. S. R. Vol. XX pp. 48 f. plate V no. 4. The designation "well-inscription" is misleading, as the slab does not appear originally to have belonged to a well.

to arrange next winter for the exploration of the Mōrā site. It is hoped that excavation round the ruined temples will lead to the discovery of further sculptural remains and thus enable us to decide whether indeed the fragments found on the surface have belonged to the images of the five Pāṇdavas and their consort Draupadī. The work, if sanctioned, will be carried out under the supervision of Pandit Radha Krishna who has given such signal proof of his intelligent interest in the antiquities of Mathurā.

J. PH. VOGEL,
 SUPERINTENDENT, ARCHAEOLOGICAL SURVEY,
Buddhist and Hindu monuments,
Northern Circle.

	Dohra Dūn	Lakha Mandal temple and images in its vicinity at Khat Bander, Pargana Jaunsar and Bawar.	Notification No. $\frac{2071 M}{367}$ dated 27th July 1909 confirmed by Notification No. 3123 $\frac{M}{367}$ dated 23-11-1909.
	"	The Asoka stone at Kalsi.	Notification No. $\frac{2071 M}{367}$ dated 27th July 1909 confirmed by notification No. $\frac{3119 M}{367}$ dated 23rd Nov. 1909.
	Agra	Jaswant Singh-ki-Chhatri situated in village Rajwara, Tahsil Agra.	Notification No. $\frac{3131 M}{357}$ dated 24th November 1909.

APPENDIX

List of inscriptions .

Locality.	Inscribed object.	Dimensions.
1. Rāl Bhadār, 8 miles north-west of Mathurā city; now Mathurā Museum No. A 71.	Pedestal of Buddha statuette (ht. 9").	One line, 11½" long.
2. Lākhanu, 6 miles south-east of Hāthras, now Mathurā Museum No. A 63.	Life size Bodhisattva statue standing.	One line incised on top of pedestal and divided into four portions, rest of inscription lost.
3. Bāghīcha on road to Brindāban, now Mathurā Museum No. E 25.	Male figure, standing.	Two lines, mostly defaced 11½" and 12" long.
4. Mōrā 6 miles west of Mathurā, now Mathurā Museum No. E 20.	Two fragments of female figure standing (ht. 3' 1").	Three lines mostly obliterated, preserved portion 11" long.
5. Anyor 3 miles south-west of Gobardhan, now Mathurā Museum No. A 66.	Buddha statuette seated (ht. 1' 2").	Two lines, 7" long, indistinct.
6. Mathurā city (Bhūtēsar Mound) (?), now Mathurā Museum No. C 21.	Nāga statuette standing (ht. 9¼")	One line, 5" long.
*7 Balbhadar Kund near Mathurā; now Mathurā Museum No. B 4.	Statuette of Vrishabhānātha seated (ht. 2' 10").	Three lines.
8. Rāl Bhadār, 8 miles north-west of Mathurā city; now Mathurā Museum No. C 28.	Figure of Yaksha and Yakshi (ht. 9").	Two words, placed one over the other.
9. Village of Saknā, 5 miles west of Mathurā city; now Mathurā Museum No. G 47.	Fragment with feet of female figure (ht. 3½")	Two fragmentary lines, 4¼" long.
10. Arjunpura Tīlā near Mathurā City, now Mathurā Museum No. D 52.	Sculpture with three-headed male figure perhaps Brahmā (ht. 1' 8½")	Two lines, 8" and 10" long respectively.

*This inscription was entered on the list for 1908—09 but without particulars regarding the date.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Public Works Department,
Buildings and Roads Branch, No. 425 G. S. dated 10th July 1911.

READ—

Progress Report of the Superintendent, Archaeological Survey, Hindu and Buddhist Monuments,
Northern Circle, for the year ended 31st March 1911.

REMARKS.—PARAGRAPH 2. *Preservation of Monuments.*—His Honour the Lieutenant-Governor notices that the allotment for repairs to Hindu and Buddhist Monuments was a small one, but that it does not seem to have been fully utilized

2. PARAGRAPH 4. *List of Ancient Monuments in the Punjab.*—The preparation of a complete list of monuments in the Punjab is a task which will have to be spread over a considerable number of years.

3. PARAGRAPH 7. *Museums.*—The most interesting feature of the report so far as the Punjab is concerned, relates to the acquisition for the Lahore Museum of twelve embroidered and painted Tibetan banners, one of which represents scenes in the life of Buddha. About two-thirds of the cost was provided locally, the balance being met from a grant of Rs. 1,090 made for the purpose by the Government of India.

ORDER.—Ordered that a copy of the report and of the above remarks be submitted to the Government of India in the Home Department, and that copies of the same be distributed to the Chief Secretary to Government, Punjab, the Director-General of Archaeology in India, the Superintendent, Archaeological Survey, Mahomedan and British Monuments, the Superintendent, Archaeological Survey, Buddhist and Hindu Monuments, Commissioners, and Deputy Commissioners, Superintending and Executive Engineers, and Officers and institutions named in the list circulated with Government of India, Home Department, letter No. 293 dated the 23rd July 1910.

By order of His Honour the Lieutenant-Governor,

J. T. FARRANT,
Secretary to Government, Punjab,
Public Works Department,
Buildings and Roads Branch.

ANNUAL PROGRESS REPORT.

PART I.

Departmental Notes.

1. During the first half of April the Superintendent, visited Taxilá and Kalsi in the Rawal Pindi and Dehra Dun Districts respectively. The latter half of that month he passed in Simla with the Director General of Archæology in India from whom he took over charge of his duties on the forenoon of the first of May 1910. In the month of July (15-28) I visited Rupar, Bardár and Nalagarh. September, October and November were spent in the Kulu Sub-division, Suket and Mandi States and Kangra proper. On the 19th of January 1911 I started towards Kasiá in the Gorakhpur District where the whole of the remaining portion of the year was spent in excavating the site of Máthá Kuár ká Kot. Thus I spent 171 days on tour of which 99 days were spent in the Panjab and 72 days in the United Provinces and the remaining 194 days at head-quarters.

2. The total expenditure incurred this year on the preservation of the Hindu and the Buddhist monuments in the Panjab was Rs. 687-0-3. Of these Rs. 34-0-10 were spent in special repairs to the ruined old temple in the Nurpur Fort, Rs. 106 for putting up notice boards on the ancient sites of the Kapál Mochan temples and Raja Karan ka Qila in the Ambala and Karnal Districts respectively. The rest was spent on annual repairs to the monuments listed beneath p. 14 ff. Notwithstanding a distinct allotment for the purpose nothing has been spent on the repairs proposed by this office for the small temple of Siva behind that of Sandhyá Déví at Jagatsukh in the Kulu Sub-division.

Regarding the Siva temples at Dasál and Nagar in the Kulu Sub-division, the Baijnath temple at Baijnath and Ambikesvar temple at Haripur and the protection of the Pathyár and Kanhiárá rock inscriptions I have made certain proposals in my conservation notes dated the 17th December 1910. Only one estimate, viz., for repairs to the Ambikesvar temple at Haripur amounting to Rs. 50 has since been received in this office. Proposals regarding the preservation of some of the interesting monuments in Mandi State have been sent to the Durbar through the Commissioner, Jalandhar Division, who informs me that orders have been issued by the State for the execution of one of the works suggested, namely, the construction of a pacca masonry building on the Salánu rock inscription.

In the United Provinces, Rs. 17,795-2-3 were spent on the preservation work during this year. Special repairs to the brick temple at Bhītargāon in the Cawnpur District as proposed by Mr. Longhurst were carried out at a cost of Rs. 2,853. The base of this interesting monument has been renewed up to a height of 10'. Rs. 3,177 were spent on the Dhamek Stūpa at Sārnāth. Special repairs to the Gobind Deo and Jugal Kishor temples near Muttra were completed at a cost of Rs. 400 and those to the Gupta temple at Deogarh in the Jhansi District at Rs. 712-6-7. Besides this Rs. 3,541 have been spent on the Archæological monuments at Sabeth Maheth in the Gonda and Bahraich Districts. For further particulars see Appendix B. below.

3. Report by Dr. Vogel regarding the ancient site of Taxilā was submitted to Government along with a letter dated the 20th June 1910 and the preliminary notification of its protection under the Ancient Monuments Preservation Act has subsequently been confirmed.

In the United Provinces five ancient sites in the Muttra District and one in the Allahabad District have been declared protected. A list of these will be found below in Appendix C.

I may add here that the District Officers concerned have been asked to put up notice boards on all the protected monuments in this circle with a view to prohibit the prevailing practice of disfiguring them by the public.

4. The preparation of the list of ancient monuments in the Panjab has been one of the chief concerns during the year under review. My work in this connection was confined to the Kangra District. To get the details required by the new scheme that has been drawn by Mr. J. H. Marshall I had to inspect every monument, ancient site or other archæological relic that I could know of and during the interval of some three months, I visited not less than 150 monuments collecting, as far as I could, a full account of their history, the legends connected with them, notes on their architectural and artistic features and their inscriptions. But regarding history or even legends much could not be gleaned for the people as a rule professed total ignorance. Whether they feigned it out of suspicion or in reality knew little it is difficult to surmise. The preparation of a complete list of all the monuments in the Panjab is an arduous task which will require much more time than what has been estimated. The reason is this. The monuments are too many and mostly situate at out of the way and distant places. Much time is spent in visiting them. Besides this the inscriptions and other particulars connected with them require considerable time for study. In addition to all this greater portion of the year has to be devoted to other work. Under these circumstances the list of monuments

for the Kangra District alone will take not less than two years more, and that for the whole Province will require at least ten years—to make it a comprehensive and really useful work.

5. The last two months of this year were devoted to the Archæological explorations at Kasiá in the Gorakhpur District of the United Provinces. An account of my operations there will be found in the second part of the report (page 9 ff.) Here it will suffice to remark that the discoveries made during the last season afford proof of the desirability of continuing and bringing to completion the excavations at Kasiá not only because the topographical problem of locating the ancient Kusinára or identifying Kasiá with it has not yet been finally settled but because several interesting buildings that have only been partially opened require to be fully cleared to form any definite idea regarding their structure and history.

Some trial excavations have been carried out on various sites round Muttra under the supervision of Pandit Radha Krishna at a cost of Rs. 2,000, provided from the Imperial funds. The finds include a number of inscribed bricks of an early type—*Mauryan* period—and a few fragmentary stone inscriptions. No structural remains of importance came to light. Two of the sites examined—Ganeshrá and Jaisinghpurá—are Buddhist, the third, (Morá), appears to be Brahmanical.

6. This year has brought to light an inscription which has proved to be of the highest importance to the Scythian period of Indian history. It has established beyond doubt the fact that between Kanishka and Huvishka, the great Kushána rulers, there reigned a sovereign of the name of Vasishka whose authority was acknowledged at Mathurá. It was found by Pandit Radha Krishna at Ísápur situated on the left bank of the river Jamna opposite the Visránt Ghat and has now been deposited in the Muttra Museum. Another discovery of this year which may be mentioned here is the copper-plate I found along with the coins of Kumáragupta (A. D. 413-455) from the 'Nirvána Stúpa' at Kasiá though nothing can yet be definitely affirmed regarding the writing it bears. It has been sent for examination to Dr. Hoernle. But it is not unlikely that it may throw some light on the identification of Kusinára.

Twenty-five inscriptions were copied at and near Garhwá in the Allahabad District. They are important for the local history of the place. Of those that are dated the earliest belong to the Vikrama year 1199 (A. D. 1142). Of the undated ones the earliest, on palæographic grounds, belong to the 10th century. More than one hundred inscriptions on the sculptures deposited in the Lucknow Museum were copied during this year for Professor Lüders for the *Corpus Inscriptionum Indicarum*, Vol. III. Further particulars of the inscriptions noticed in this year are given below in Appendix D.

7. During this year valuable additions have been made to the Lahore Museum. It has been enriched with twelve Tibetan banners. Museums. One embroidered banner is a real master-piece and represents Padmasambhava who converted Tibet to Buddhism. Among the painted banners there is one which represents the Wheel of Life and another shows a number of scenes from Buddha's life. The latter is of a particular interest in connection with the Gandhāra sculptures. The total cost of these paintings was Rs. 3,090. To meet this the Imperial Government contributed Rs. 1,090, the Panjab Government made a special grant of Rs. 1,500 and the Lahore Museum paid Rs. 500. Besides these, two hundred and twenty pictures of historical and mythical subjects showing great artistic skill were secured in my last tour in Kangra. Of these the bulk will go to the Lahore Museum and a few to the Delhi Museum. An inscribed stone of considerable importance for the genealogy of the Guleriá chiefs of Kangra, five brass statues and two ancient stone seals have also been added to the archaeological section of this Museum.

The Provincial Museum at Lucknow has been transferred to the Canning College building and the archaeological exhibits, excepting the finds from Kasiá which are still lying in the godowns, have been mostly arranged in accordance with the suggestions made by Dr. Vogel.

The Archaeological Museum at Sárnáth has been constructed. The expenditure incurred on it during this year was Rs. 1,888. The building has been completed but for the carved band along the front wall of the hall for which details are awaited from the Principal School of Arts, Calcutta. Rs. 4,625 were spent on furniture for the show cases and Rs. 400 on the fittings. The estimated cost of the latter work is Rs. 1,262, so Rs. 862 are still required for its completion. The exhibits have been mostly classified and arranged under the superintendence of Mr. D. R. Sahni.

No further repairs to the Municipal Museum at Muttra (Mathurá) have been carried out, the Municipal Board having declared themselves unable to contribute any funds. This Department has worked out a scheme for extending the Museum building and Mr. Gordon Sanderson has been good enough to prepare plans for such an extension the cost of which has been estimated at Rs. 50,000. His Honour the Lieutenant-Governor of the United Provinces has given the assurance that he would be prepared to consider a grant-in-aid from the Provincial Funds in case the major part of the sum required can be realized from subscriptions. An attempt to raise funds locally by subscription has had very little result and it is now under consider-

ation to address patrons of archaeology both in Europe and India. The proposed extension is absolutely necessary, as the present building is crammed with sculptures. Several pieces including the inscribed sacrificial post had to be placed outside and it is feared that they will suffer irreparable damage if exposed to the weather for any considerable length of time.

Under this section I may mention that His Highness the Raja of Suket has in the month of February laid the foundation stone of a museum called the Minto Bhim Museum at Suket. Whether any progress has been made since it was announced in papers is not known. Repeated inquiries by this office have failed to elicit any information from the State authorities.

I may add here that the Society recently established for the propagation of the Hindu literature has lately started a public museum at Allahabad. Its energetic Secretary, Major B. D. Bose, I. M. S. (retired) has, I understand, deposited in it his very interesting collection of the Gandhāra sculptures and its promoters intend to make it as representative an institution as possible.

Publications. 8. List of publications by this office during the year will be found in Appendix H below.

Office Library. 9. My office has in its library 544 volumes in all to which 20 books were added this year. They are mostly official reports, gazetteers or directories in Urdu. There are few good books of reference in this office library and the result is that books have to be borrowed from elsewhere which causes considerable inconvenience. Necessity has been felt for books for constant reference, and unless arrangements are made to enlarge the stock on hand the desideratum will grow keener.

Personnel. 10. Dr. Vogel was appointed to officiate as Director-General of Archaeology in India during Mr. Marshall's absence on leave for one year and seven months and he made over charge of his current duties to me on the 1st of May 1910. The clerk and the photographer were on leave, the former for one month and two days and the latter for one month and fifteen days. A temporary hand on Rs. 30 per month was appointed when the clerk was absent on leave. The second draftsman was on sick leave for a period of three months from the 1st of September to the end of November. No substitute was appointed in his stead. The head draftsman has almost throughout the whole year worked for the Superintendent, Muhammadan and British Monuments, Northern Circle, Agra.

Thirty seven drawings were made during the year. Of these 17 were finished in ink and 20 in pencil. Their descriptive list is given in Appendix F.

In all 170 photographs have been taken. Of these 56 relate to the Lucknow Museum, and 27 are the copies of some very fine pictures belonging to His Highness the Raja of Mandi. Of the latter twenty form the illustrations of a booklet called the *Hamirahatha* in Hindi verse giving a rather chimerical account of the fight between Hamir (the Chauhan of Ranthambor, A. D., 1283—1301) and A'la-ud-din (Muhammad Shah A. D., 1296—1316). They show great artistic skill of the painters of Kangra. The original sketches of most of them I have secured for the Lahore Museum. The remaining pictures represent the various forms of Durgá, the Divine heroine of the *Márkandeyapurāna* and are good specimens of the Kangra art. The rest of the photographs pertain to the buildings in Kangra and the archæological excavations at Kasiá.

11. The first three weeks of April 1911 will be spent at Kasiá on the excavation work carried out there and the last week in making over the finds from Kasiá to the Curator of the Lucknow Museum and in the inspection of the Sárnáth Museum. The month of May will be spent at head-quarters in writing the report and an article on the exploratory work carried out in this circle during the last season for the Royal Asiatic Society's Journal. The month of June will be spent in Simla in writing my contribution to the Annual Report of the Archæological Survey for 1911-12. Four months, July to October will be devoted to the preparation of the list of ancient monuments in Kangra and Chamba. Dr. Vogel has to revert in the month of November and will have his own programme for the cold season. If the proposals regarding the continuation and bringing to completion the excavations at Kasiá were accepted I shall spend the major portion of the next cold season at Kasiá.

HIRANANDA SÁTRÍ.

*In charge of current duties of the Superintendent,
Hindu & Buddhist Monuments, Northern Circle.*

PART II.

Preservation of monuments.

KANGRA DISTRICT.

In my conservation notes I made the following proposals :—

Kulu Sub-Division.

Temple of Gaurisankar at Dasál.—This sanctuary is handsomely and profusely decorated with well executed carvings and on account of its artistic interest should be taken over by Government and regularly inspected by the officers of the Public Works Department. The spire is in a ruinous condition and will have to be rebuilt. The whole roof should be made thoroughly water-tight and cleared of vegetation. The new structure lately erected by the *kārdār* should be dismantled for it screens the façade.

Temple of Gaurisankar at Nagar.—This shrine is very badly neglected by the man in charge and should be taken over and inspected by the Public Works Department. On no account should it be used as a repository of sweepings and cow dung as it is being done now. In cases like this the proper observance of the conditions of the grant (*muāfī*) should be enforced in accordance with the Ancient Monuments Preservation Act of 1904.

Mandi State.

Salānu rock inscription.—This very interesting record of about the fourth century (A. D.) and the earliest known in the Kulu valley lies in the territory of Mandi. It has badly suffered from exposure and I have proposed a pacca masonry building surmounted by a sloping roof to be erected over the rock bearing the inscription with a view to save it from further damage and decay. The building should remain locked (to protect it from being used by vagabonds) the key being deposited with some responsible official in the nearest village. A tablet bearing the translation of the record in Hindi and English should be let into the outer wall to give an idea of what the record means.

Adhnāri temple in the town of Mandi.—The Adhnāri (Sanskrit. *Ardha-nārīsvara*) temple in the town of Mandi, which is a very fine shrine and shows great artistic skill, should be freed from the over-growing vegetation. The cracks and fissures should be cemented. The water falling in the open *mandapa* should not be allowed to collect.

KANGRA PROPER.

The temple of Baijnāth.—The roof edge of the porch is far from being water-tight, especially the portion lately repaired by the Public Works Department leaks very badly. It should be repaired and made water-tight. The spire should be cleared of the overgrowing vegetation.

The Pathyár and Kanhiará rock inscriptions fully described by Dr. Vogel in the IV volume of the *Epigraphia Indica* should be protected by Government and ordinary pacca masonry building with a sloping roof like one proposed for the Saláan inscription erected on the boulders.

Explorations.

EXCAVATIONS NEAR KASIÁ.

The archaeological excavation at the *Máthá Kudár ká Kot* near Kasiá in the Gorakhpur District of the United Provinces was resumed this year on the 26th of January and carried on till the middle of April last at a cost of Rs. 3,000 provided from the Imperial Funds. A detailed statement of expenditure for it is given beneath (p. 12). A general plan showing the work done is also added.

Stúpa A. Some of the Buddhists of Burma had applied for permission to repair the large *stúpa* (A) standing behind the *Nirvāna* temple. Before any repairs were executed it was thought expedient to first of all examine the contents of this colossal structure. Top portion of it, about 25 feet high and 56 feet in circumference, was, therefore, dismantled. A shaft was then sunk at the centre which was carried down to the water level. At a depth of about 14 feet a copper pot covered with a copper-plate, bearing several lines of writing, was discovered from a circular little chamber 2 feet wide and deep. The copper plate, what is very unusual, had only one line engraved the rest being written in black ink. It was all covered with thick rust, which defied cleaning for fear of damage to the writing and has now been sent for examination to Dr. Hoernle. The copper pot (Hindi *gágar*) is evidently a reliquary. Its contents are: sand, burnt charcoal, small *cornies*, precious stones of various sorts, small pearls, etc. Besides these it had two copper tubes, one had a chalk like greasy thing and the other had ashes, pearls, one small emerald and the silver coins of Kumáragupta (fan-tailed peacock type) the son and successor of Chandragupta II who flourished about A. D. 413. The latter shows that the *stúpa* was erected early in the fifth century A. D. Inside the latter tube there was a silver tube which contained a gold tube having a minute quantity of some brown substance and two drops of water. Dr. Hankin, the Chemical Examiner at Agra, examined the contents of the copper pot but could not discern any traces of human bones. They appear to consist of sand mixed with vegetable matter and a little chalk. But it is difficult to surmise whose and what sort of relics these are unless the writing on the plate threw any light on this question.

Going lower down at a depth of 34 feet a little *stúpa*, evidently older than A, was found. This has a small niche which enshrines a nice terracotta Buddha facing west. The western side of it from bottom to top has been laid bare and its interior thoroughly examined. Apart from a small earthen pot which contains some dust and charcoal and shows that the structure is a sort of Buddhist tomb, nothing of any interest was found in it.

Monastery Q.—Opposite the temple which enshrines the colossal statue of the dying Buddha a row of cells, evidently the remains of a monastery, were exhumed at a depth of about 8 feet. The ground level of *stúpa* A is the same as that of this monastery, which must be, on the evidence of the floor level at least, a very old structure if not the oldest on this site. It was here that minor antiquities of considerable interest, like the clay seals with the coffin of Buddha between the two *sal* trees, and the legend *mahāparinirvāna bhikṣusamghasya*, a silver Satrap coin, bricks of unusual size ($25' \times 14'' \times 3\frac{1}{2}''$) and terracotta figures were found. Charred wood in a door of one of the cells would point to its destruction by fire. Buildings found on this part of the site show at least three periods of habitation the earliest being not later than the days of the early Guptas. To the north-west and east of the *Nirvāna* temple in the fields buildings have been unearthed. Their existence was not indicated by any elevation of the soil. There can be little doubt that numerous remains of monuments still lie hidden among the fields round the buildings that have yet been excavated and that they would certainly repay excavation.

To the west of the monastic building I the remains of a complete monastery evidently co-existent with I were completely unearthed. Debris thrown on it in previous years took much time and labour. It is paved with large brick tiles like I and has several shrines and a kitchen. This circumstance would show that while I was meant for putting up pilgrims it was intended to feed and provide them with place for worship or meditation.

At the site called the *Māthā Kuār* the remains of the chapel found by Mr. A. C. Carlleyle were cleared together with the nice brick pedestal of the Bodhi image. The monastery of which it formed a part was also traced out as far as it lay in the land acquired by Government although there was no indication of it on the soil. It extends towards east and south in the fields not yet acquired by Government. Evidently it is a later building. In plan it resembles the monastery No 21 at Saheth in the Bahraich District of the United Provinces. Excepting a few clay seals of the Buddhist creed and a *kushān* copper coin no antiquity of interest was discovered here.

The *Rāmābhār Stúpa* was thoroughly examined by sinking a shaft at the centre down to the water level, but no deposit of any sort could be found. To the south the remains of a structure probably later than the *stúpa* have been unearthed. The nature of that structure is not clear. Ornamental bricks of unusual size varying between $2' \times 7'' \times 5''$ and $1' 4'' \times 8\frac{1}{2}'' \times 5''$ were found in abundance. Most of these when joined would form human and other images of sorts showing how beautiful must have been the edifice which was built of them.

The great question of the identity of Kasiú and Kusiárá is not yet finally settled. The important topographical problem of locating Kusiárá and the *Vethadípa* or *Vishnudvípa* is still to be solved. Both of these points possess not only considerable academical interest but are of great importance to the followers of Buddha. Consequently the exploration of this interesting site should be brought to completion.

As the matter now stands it is highly desirable that first the excavation work at the *Mátha Kuár ká Kot* commenced this year should be completed; 2nd, the whole plot between the *Nirvána* temple and the monastery D should be thoroughly examined; 3rd, some trial excavations should be made at Anarudhwá and mounds near it to ascertain their nature; 4th, to make proper arrangements to drain off water and protect the buildings that have been unearthed. I reckon that in four months of the next cold season, November to February, the exploration of the whole site can be completed though it is, of course, impossible to say what remains are still lying under ground. The excavations will have to be carried out on a large scale. An estimate of the cost of four months excavations is added beneath.

LIST OF FINDS.

1. One copper-vessel *(*gágar*) containing relics, several silver coins of Kumáragupta, jewels and pearls, etc., and a copper-plate.
2. *Three boxes containing pottery, stone fragments and one stone image of Ganesa.
3. *Eight boxes containing carved bricks.

37	300	Do. ...	Ditto ...	1/2

APPENDIX G.

List of Acquisitions for Museums during the year 1910-11.

1.—LAHORE MUSEUM.

1. Inscribed stone tablet ($2' \times 1' 3\frac{1}{2}"$) from Haripur, District Kangra. This inscription is dated in the Samvat year 1856 (A. D. 1799) and gives the genealogy of the Guleriá princes.

2. Brass statuette (height $6\frac{1}{4}"$) of the Bodhisattva Avalokiteśvara or Padmapāni seated cross-legged in a lotus-seat. It is four-armed, two are folded before the breast in the attitude of adoration (*namaskāra*), the left upper hand holds a lotus flower, the right upper hand holds a rosary. The miniature figure shown in the diadem represents the Dhyāni-buddha Amitābha.

3. Copper statuette (height $5\frac{1}{4}"$) of Śākyamuni Buddha, seated cross-legged in the "earth touching" (*bhūmisparśa*) attitude. This is the posture in which the Buddha attained to enlightenment—he calls the earth as a witness of his good deeds. The Thunderbolt represented in front symbolizes the "admantine Seat" (*vajrāsana*) in which the Buddha was seated at the moment.

4. Brass statuette (height $7"$) of the Buddha like No. 3 excepting the symbol of thunderbolt which is omitted here.

5. A miniature brass statuette ($1\frac{1}{2}" \times 1"$) representing Lakshmi shampooing the feet of Vishṇu who lies on the bed of Śesha with his usual attributes.

6. Copper statue (height $12\frac{1}{4}"$) of standing Śiva ? having a garland of human heads. Of the four arms the left upper holds a bow, the left lower a blade-like object with handle. The right upper hand has perhaps a fish or snake and the right lower *damaru* ?; A small figure standing to the right side with folded hands and the head of a ram possibly represents Dakṣha Prajāpati or a *gana*.

7. Carnelian seal with a standing female figure holding a Carnucopia in the right hand and the Kharoshthi legend "Chalusa."

8. Amethyst seal bearing the figure of Zeus seated with a staff in his right and a wreath in his left hand.

9. One embroidered banner representing Padmasambhava, a masterpiece of Tibetan art.

10—20. Eleven painted banners—one of these represents the wheel of life and another shows a number of scenes from the life of Buddha.

21—240. Two hundred and twenty pictures and drawings from Kāngra district. (A few of these will go to the Delhi Museum of Archaeology). These are either of mythological subjects or are historical portraits.

2.—LUCKNOW MUSEUM.

1. Fragmentary inscribed stone pillar from Main, Tahsil Bidhauná, District Main-puri.
2. Brass bull with ornamental back (height $2\frac{1}{2}$ ") from Bithúr, District Cawnpur.
3. A miniature Garuḍa of brass.
4. Two copper bracelets 3 " and $3\frac{1}{2}$ " in diameter ; from Bithúr.
5. One copper armlet (*ananta*) 3" in diameter ; from Bithúr.
6. Carved stone door-jambs, two being fragmentary ; from Balrampur, Gonda District.
7. Axe-head of bronze (6 " × 4 ") ; from Bithúr.
8. Copper spear-head (1' 7" × $2\frac{1}{2}$ ") ; from Bithúr.
9. Two axe-heads ($7\frac{1}{4}$ " × 5" and $5\frac{1}{4}$ " × 5") ; from Bithúr.

(For finds from Kasiá deposited in the Lucknow Museum see p. 11 above.)

3.—MATHURÁ MUSEUM.*

	Rs.	a.	p.
1. Stone bowl (height 2' 4") decorated with vine pattern, from Sadar Bazar	26	0	0
2. Stone sacrificial post (height 19' 7") or <i>Yápa</i> with inscription, from Isápur	10	0	0
3. Stone sacrificial post (height 19' 7") or <i>Yápa</i> without inscription, from Isápur	10	0	0
4. Stone door-jamb (height 2' 9") from Isápur	15	0	0
5. Seven gold coins, from Mathurá market	120	0	0

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab
in the Public Works Department, Buildings and Roads
Branch No. 537—A. G. S., dated 8th July 1912.

READ—

Progress Report of the Superintendent, Archaeological Survey, Hindu and Buddhist
Monuments, Northern Circle, for the year ended 31st March 1912.

Remarks.—Paragraph 7. Museums.—His Honour the Lieutenant-Governor has noticed that the important works of the year were (1) the deputation by the Punjab Government of Mr. Whitehead, I. C. S., to catalogue the collection of coins in the Lahore Museum, which has recently been increased by the purchase of the Bactrian Section of the Bleazby collection at the joint expense of the Imperial and Punjab Governments. The work is well in hand. (2) the cataloguing of the Græco-Buddhist sculptures in the same museum by Mr. Hargreaves. These two collections of Græco-Bactrian antiquities are perhaps the best of this period.

The Punjab Government also got back the Mumtaz Mahal in the Delhi Fort from the Military Authorities and suggested the transfer of the Naqar Khana Museum to this building which was restored and adapted by the Punjab Public Works Department. The transfer of the Museum and the collection of loan exhibits were admirably carried out by Mr. Gordon Sanderson and Mr. J. P. Thompson, I. C. S., who compiled a scholarly and interesting catalogue of the exhibits.

Order.—Ordered, that a copy of the report and of the above remarks be submitted to the Government of India in the Home Department and that copies of the same be distributed to the Chief Secretary to Government, Punjab, the Director-General of Archaeology in India, the Superintendent, Archaeological Survey, Muhammadan and British Monuments, the Superintendent, Archaeological Survey, Buddhist and Hindu Monuments, Commissioners, Deputy Commissioners, Superintending Engineers and Executive Engineers and officers and institutes named in the list circulated with Government of India, Home Department, letter No. 298, dated 23rd July 1910.

By order of the Hon'ble the Lieutenant-Governor,

R. S. MACLAGAN, COLONEL,
*Offg. Secretary to Government, Punjab,
Public Works Department,
Buildings and Roads Branch.*

ANNUAL PROGRESS REPORT.*

PART I.

DEPARTMENTAL NOTES.

From the commencement of the year under review up to the 15th of February last my Assistant, Pandit Hirananda, has been in charge of my office. He spent 228 days in camp and 103 days at headquarters. After closing the excavation at Kasi in the Gorakhpur District of the United Provinces, he visited Lucknow, Ajodhya and Sarnath during the third week of April and returned to Lahore on the 28th of that month. He spent 20 days (17th June to 8th July) at Simla in writing his article on the Kasi excavations for the Annual Report of the Director-General. After visiting Bithur he proceeded to Ketas during the first week of August and inspected the temples of the Salt Range. He returned to Lahore on the 14th, left again for Chamba on the 16th and passed the rest of the season in listing the monuments of that State. He returned to headquarters on the 1st of November. On the 26th of that month he proceeded to Kasi where he devoted nearly the whole cold season to exploratory work. During this period he also inspected the sites of Saheth-Maheth in the Gonda and Bahraich Districts (4th December), Bhitargaon in the Cawnpore District (10th-11th December), and Deokali in the Fyzabad District (16th-17th January).

I resumed my charge at Agra on the 15th of February and after visiting Sarnath (23rd February to 6th March), Kasi (8th to 11th March), Lucknow (13th to 19th), Aligarh (20th) and Muttra (22nd to 28th), I returned to Lahore on the 29th of March.

2. In the year under report Rs. 1,653-9-3 were spent on the preservation of Hindu and Buddhist monuments under my charge in the Panjab and Rs. 14,752-0-5 in the United Provinces. These figures will show at once that the more important works were those in the latter province, as indeed might be expected from the greater abundance of pre-Moslim remains in the Gangetic plains. I mention especially the work of conservation of the well-known Dhamekh at Sarnath near Benares which was continued in the course of the year and will still require one year at least to be brought to completion. The archaeological museum at the same place was completely fitted out and furnished. The carved decorative friezes, on the central hall were taken in hand as soon as the models were received from Mr. Percy Brown, Principal, School of Art, Calcutta. Another important work was that of preserving the ancient brick temples at Bahua and Tinduli in the Fatehpur District on which a sum of Rs. 1,663 (out of Rs. 1,998 sanctioned) was expended.

In the Panjab works on Hindu and Buddhist monuments were limited to periodical repairs.

In accordance with the suggestions made by Pandit Hirananda in his Conservation Notes, dated the 17th December 1910, regarding some monuments in Kangra, estimates amounting aggregately to about Rs. 800 were received from the Executive Engineer, Provincial Division, Kangra.

With a view to protect the temple at Malot, Jhelum District, the Public Works Department sent an estimate amounting to Rs. 934, in the month of June. Further repairs to the main shrine and its adjunct as well as the other important temples of the Salt Range have been suggested by Pandit Hirananda in his Conservation Notes, dated the 15th November last. For further particulars see appendix below.

* This report, though signed by me, has been mostly written by Pandit Hirananda who was in charge of my office during the year under review, except for the last one and a half months.—[J. Ph. V.]

3. Of monuments protected under the Ancient Monuments Preservation

Protection of monuments under the A. M. P. Act of 1904. Act of 1904 during the year under review, three, namely, the site of Taxila, Rawalpindi District, and the Siva temples at Dasál and Nagar in the Kulú Sub-Division of the Kangra District, belong to the Panjab and two, namely, the Fort of Garhwa, Allahabad District, and the so called Fort of Uttanpáda, to the United Provinces. The latter, rising to the north of Bithúr, a village situate some 12 miles to the north of Cawnpore on the right bank of the Ganges, has yielded several interesting pre-historic implements. Further particulars regarding these monuments will be found in the appendix below.

4. About two months and a half were devoted to listing the ancient

List of ancient monuments in the Panjab.

monuments in the Panjab. During this period the temples of the Bharmaur and Churáh Wazárats of the Chamba State and the monuments of Chamba Town were visited and the requisite particulars recorded. Most of the monuments of the Kangra District and the adjoining Hill States have now been listed. It is hoped that by next winter Pandit Hirananda will be in a position to send his list of monuments in Kangra with a historical introduction to the press. The Rev. Dr. A. H. Francke of the Moravian Mission has been good enough to prepare lists for British Lahul and Spiti which will be incorporated in the above mentioned publication.

5. During the cold season of the year under review several sites were

Exploration.

explored, all belonging to the United Provinces. That at Kasiá in the Gorakhpur District was examined by Pandit Hirananda and those at Muttra by Pandit Radha Krishna. An account of these explorations is given in the second part of this report. At Kasiá several clay sealings, mostly of the *Maháparinirvána Vihára*, and a number of interesting terra-cottas were unearthed. Several buildings, both at the main site of Máthá Kuár and the adjoining sites of Rámabhár and Anrudhwá have been exposed. Some of these, as is evident from the bricks of which they are constructed, are of very high age and must be relegated to about the Maurya period. Unfortunately no document has come to light conclusively to prove the identity of the site with Kusinára or Kusanagara. Yet the finds made on the spot seem all to favour the proposed identification, particularly the clay sealings bearing the name of the Convent of the *Maháparinirvána*. I may point out that at Sárnáth Sir A. Cunningham and Mr. J. H. Marshall, C.I.E., after him, have discovered similar object referring to the *Múlagandhakuti* which undoubtedly existed at Sárnáth. It is a natural inference that the *Parinirvána* seals likewise belong to the place where they were discovered, or, in other words, the site of Kasiá marks the spot of Buddha's *Nirvána*. Further proof is supplied by the copper-plate found in the course of last year's excavations, as will be shown below in the section under Epigraphy.

The excavations at Mathura (Muttra) have yielded excellent results and reflect much credit on Pandit Radha Krishna. Most important is the discovery of an inscribed life-size stone statue of Kánishka, the great Scythian ruler of India, found near the village of Mát. It is the first instance of a royal image found in this country. The head is unfortunately gone, but the rest is very well preserved. The inscription reads: *Mahārāja Rājātirāja Devaputro Kánishko*: "The King, the king of kings, His Majesty Kánishka." With the Kánishka statue two more inscribed stone images were found, one a torso with elaborately carved belt, and the other a colossal figure of an Indo-Scythian king seated on his throne. The inscription incised on the pedestal between the feet is unfortunately partly defaced, but the titles are clearly legible and indicate that the statue represents a ruler of the Kushán house. His name is indistinct, but is evidently not one of the names known to history.

Pandit Radha Krishna also conducted excavations on the Katrá site of Muttra City, but the inscription of Vásuska, mentioned by Dr. Führer, was not found in the indicated spot, and there is, therefore, some reason to doubt whether it ever did exist.

6. The copper-plate discovered last year by Pandit Hirananda in the

Epigraphy.

Nirvána Stupa of Kasiá has now been cleaned and deciphered, thanks to the combined efforts of Dr. A. F. R.

Hoernle, C.I.E., and Mr. F. E. Pargiter, I.C.S. (retired). The plate, as Dr. Hoernle informs me, is inscribed in ink, or rather a sort of black enamel paint, with the identical *Nidāna-Sūtra* which was discovered some years ago engraved on some burnt brick tablets found at Gopālpur in the Gorakhpur District. The writing ends with the words *Nirvāna-chaitya lāmrāpatta-iti*, meaning "The copper-plate (deposited) in the Stūpa of the Nirvāna." The mention of the *Nirvāna-chaitya* in this document makes it highly probable that the stūpa belonging to the Temple of the dying Buddha of Kasiā marks indeed the spot where Gautama Buddha was supposed to have attained to Nirvāna.

The inscribed statues of Kushān kings found at Māt near Muttra have already been noticed above.

7. In the course of the year proper arrangements have been made for the cataloguing of the Græco-Buddhist sculptures and the coins in the Lahore Museum. Mr. R. B. Whitehead, I.C.S., has undertaken to catalogue the coins which have now been enriched with the Bactrian section of the Bleazby collection. Mr. H. Hargreaves has been placed on special duty for six months to catalogue the Gandhāra sculptures, the cost of his deputation till the end of the financial year having been met by a special grant sanctioned by the Government of India.

The Delhi Museum of Archæology has been transferred from the Naqār Khāna to the Mumtāz Mahal. In connection with the Imperial Durbar a valuable collection of loan exhibits were brought together, mainly through the efforts of Mr. J. P. Thompson, I.C.S., and Mr. Gordon Sanderson of the Archæological Department. The former wrote a scholarly catalogue of the collections.

Pandit Daya Ram Sahni, M.A., was appointed Curator of the Lucknow Museum, and has since been engaged in arranging and labelling the exhibits. He has also to revise and complete the catalogue prepared by Babu Rakhāl Das Banerji in 1909. It is expected that the appointment of an expert will render further supervision on my part superfluous.

The Mathura Museum of Archæology has now been taken over by the Provincial Government and an annual grant of Rs. 1,000 has been sanctioned for its upkeep. Pandit Radha Krishna has been in immediate charge of the collection which, owing to his efforts, has grown to such an extent that the present museum building has become insufficient for its accommodation.

8. In the course of the year the first volume of my work "Antiquities of Chamba State" has appeared. The preliminary publication of my "Tile-mosaics of the Lahore Fort" was continued. A complete list of publications by me and my Assistant during the year is given below in Appendix G.

9. Books have been added to my office library at a cost of Rs. 1,762-6 out of which Rs. 70 were met from the ordinary budget and Rs. 1,692-6 by re-appropriation sanctioned by the Government of India. The addition of a number of important books of reference to my office library has to a certain extent removed one of the main difficulties experienced in past years.

10. I made over charge of his office to Mr. J. H. Marshall, C.I.E., from Rangoon on the forenoon of the 10th February and resumed charge of mine on the 15th of that month when I reached Agra. The intervening days during which Pandit Hirananda remained in charge of my office were passed in returning from Burma.

My clerk was granted privilege leave on medical certificate for a period of two months and two days. During his absence a temporary hand was appointed on Rs. 30 per month. The head draftsman was on privilege leave for three months. During this period the second draftsman took his place and a temporary draftsman on Rs. 30 a month was employed to act for the latter.

As in the last year, my head draftsman, M. Ghulam Muhammad, worked for the Superintendent, Muhammadan and British Monuments, till the middle

of February and prepared for him a set of large scale drawings relating to the tomb of Rukn-i-'Alam at Multan. They include an elevation in colours, depicting the brilliant tile decoration of the building. These drawings do great credit to the ability and perseverance of my draftsman.

Altogether, sixteen drawings were prepared during the year under review. Of these one was finished in colour, two in ink, and the rest in pencil. They are described in Appendix E. below. The second draftsman had to do much of the photographic work in camp, the photographer being mostly engaged in making up arrears.

At the request of the Director-General of Archæology the photographer was also deputed to take estampages of the rock inscriptions at Shāhbāzgarhī and Mansēhra in the Frontier Circle for Professor Hultzsch in connection with that scholar's new edition of the Asoka inscriptions. The preparation of squeezes of those inscriptions is a far from easy task, but Dr. Stein who kindly exercised some supervision, informs me that M. Ghulam Nabi did the work extremely well.

11. The first three weeks of April spent at headquarters have been devoted to office routine and to the writing of the present report. The rest of summer will be spent at Simla, mainly in editorial work. As no decision has yet been taken by the Government of India on my application for eighteen months' combined leave with effect from the 24th September, I am not in a position to make any proposals for the cold season. It is hoped that the excavations at Muttra will be continued, as no place is more likely to yield Kushān inscriptions of great historical interest. In the Panjab the preparation of a complete list of ancient monuments will have to be continued. It is expected that this work will require many more years.

Programme for the next year.

PART II.

PRESERVATION OF MONUMENTS.

1. *Dhamekh Stūpa at Sārnaṭh near Benares.*—This Buddhist building familiar to many is the best preserved monument of its kind in the United Provinces. Yet the stone facing has fallen away over a considerable portion of its surface and the process of decay was sure to continue unless steps were taken to counteract it. On the north side the carved stones showed dangerous signs of bulging. Consequently it has been found necessary to edge off the carved surface with plain stone work and to dismantle and rebuild the bulged portion. The total amount estimated for this work comes to Rs. 15,000 of which a sum of Rs. 5,000 could be utilized in the year under review.

2. *Archæological Museum at Sārnaṭh near Benares.*—The new Sārnaṭh Museum building designed by Mr. James Ransome, late Consulting Architect to the Government of India, has already been mentioned in a previous report. The building was completed in the summer of 1910 but for two carved stone friezes on the outer wall of the central hall. Models for these friezes prepared in the School of Art, Calcutta, were not received until the end of last cold season, so that only now the building can be brought to completion. In the meanwhile the edifice including the living rooms, has been wholly fitted out and furnished and a commencement has been made to lay out the grounds in front with grass and shrubs. That the Sārnaṭh Museum is largely frequented and vastly appreciated appears from the names and remarks in the visitors' album. I may mention here that in the course of the season it was visited by His Excellency the Viceroy.

3. *Brick temples at Bahua and Tinduli, Fatehpur District.*—For particulars regarding these temples I may refer to my note published in December 1907, and also to an illustrated paper on the same subject published in the Annual Report, Archæological Survey for 1908-9. The important temple at Bhitargaon in the Cawnpore District was repaired in the year 1910-11 and is reported now to be safe. Two of the smaller brick temples in the Fatehpur District were taken up in the course of the year under review. The Divisional Engineer reports that the south side of the temple at Bahua has been rebuilt and repairs have

been done on the north side. The roof has been strengthened by means of concrete terracing. The spire of the Tinduli temple, about half of which on the north and west sides is broken, is to be rebuilt and the cracks in the masonry are to be filled. Repairs on the Bahua temple were completed at the end of the year, those on the Tinduli temple were still in progress.

EXPLORATION.

4. *Excavation near Kasiá.*—The site at Kasiá in the Gorakhpur District of the United Provinces was again explored this year. The work was resumed on the 1st of December and carried on up to the end of March at a cost of Rs. 3,000 provided by the Director-General of Archaeology in India from Imperial funds. The details of the expenditure incurred are stated below (p. 7). A reference plan is appended at the end of the present report. As stated above, the excavations were conducted by Pandit Hirananda who has supplied me with the following *résumé* of the work achieved.

5. *Central group of monuments.*—Excavation was continued to the west of the Nirvána temple, and the monasteries (Q-Q.) partly opened last year, were fully excavated. These are two monastic buildings adjoining each other and probably erected about the same time. Exteriorly they measure 48' 6" by 39' 3" and 46' by 41' 6" respectively. The cells to the south of Q have yielded some clay sealings of the Gupta period bearing the legend *Srīmahāparinirvāna*, etc. Above the inscription we find the coffin of Buddha placed between two sál trees. In a cell apparently built on the south-west corner of Q was found a pot of ashes which contained some clay sealings bearing the word *Mahāparinirvāna* and the effigy of a goddess (?Háritī) surrounded by children. This cell contains a little tank or well of cool water. In order to reach these remains, débris about 9' deep had to be removed. To the east of these buildings and near the north-west corner of the Nirvána temple a large terra-cotta figure, evidently of a female deity, was unearthed. Its upper portion has disappeared. Of two attending figures one seated to the left side is entire and very life-like. The drapery is somewhat similar to that found in Kushánu sculpture.

To the east of the monastery Q the basement of a shrine, 49' by 16½', was opened. The débris here yielded several terra-cotta figures which are more or less well preserved. Due north of the Nirvána temple was opened a complete basement of a monastery which, on the evidence of its large bricks (19" by 12" by 4"), must have been built about the Maurya period. Its outer dimensions are 35' long and 17' 3" wide. This structure and to some extent the buildings marked Q. Q., are different in plan from the monasteries that have hitherto been opened on the Kasiá site.

Leaving aside the remaining buildings exhumed to the north side, I may mention a platform-like structure with stairs partly concealed under the plinth of the Nirvána temple. Presumably it is connected with some early structure hidden under the said plinth.

An examination of the little *stúpa* partly hidden under the plinth of B. and standing to the north-east led to the discovery of two cells which apparently belong to a monastic building constructed prior to the edifices called B. and C. both of which were raised over it. It is built on the same level as the monastic building ascribed to the Maurya period and noticed above. The size of the bricks in both is also the same. The monastery was fully traced out; exteriorly it measures 169' by 112' 4". Save a copper ring bearing the legend *Vitakasya*, a few votive sealings, the handle of a sword and iron dowels or nails, nothing of interest was found in it.

6. *Anrudhwá.*—The mound at Anrudhwá was examined but, excepting a few late wallings, it yielded nothing. The plot in the village partly excavated in 1906-7 was thoroughly examined with the result that four small *stúpas* came to light. Excavation here led to the discovery of four nice brick panels, one of which represents the nativity of the Buddha.

7. *Rámabhar*.—The plot adjoining the large *stúpa* towards the south and east was taken up. Fourteen *stúpas*, four of which are almost entire, were opened. The one occupying the east end of the row was examined and yielded some hundred clay tablets bearing three *stúpas* and the Buddhist creed formula. It is surrounded by an enclosure which opens southwards. The building believed to be a temple which was opened last year was further explored. The outer building encloses three platform-like structures which exhibit changes effected at different periods. A circular wall which appears to have formed an enclosure or a procession path round the principal *stúpa* and which is between 19' to 22' wide was traced from east to west at the south side. It goes on regularly, except due south where it is joined to the above mentioned structure.

The finds which will be preserved in the Lucknow Museum may be summarized as follows: two boxes of clay sealings, two boxes of pottery, three boxes of terra-cottas, eight boxes of carved bricks and one box of minor antiquities.

The bearing of the recent explorations on the topographical problem has already been discussed in the first part of this report. It is not unreasonable to hope that further exploration will bring to light some epigraphical document which will remove all further doubt as to the identity of the Kasiú site with the traditional place of Buddha's Nirvána.

APPENDIX F.

List of Acquisitions for Museums during the year 1911-12.

1.—LAHORE MUSEUM.*

1. Charm box decorated with eight lucky symbols.
2. Brass statuette of Avalōkitēśvara, seated, four-armed.
3. Brass statuette of Buddha Amitābha (?), seated, two-armed.
4. Brass statuette of Buddha Śākyamuni, seated in the "earth touching" attitude.
5. Brass statuette of the Bōdhisattva Mañjuśrī seated, two-armed, holding sword in right hand.
6. Statuette of a Buddha, two-armed, seated in the "earth touching" attitude.
7. Tibetan temple banner.
8. A copper Tibetan statuette of a Bōdhisattva.
9. Græco-Buddhist bas-relief relating to the birth of Buddha's horse and groom.
10. Large copper image of Visvarūpa.
11. Gilt copper statuette of the goddess Tārā seated in the "gift bestowing" attitude.
12. Brass statuette of the Grand-Lama who in A. D. 1415 founded the great monastery of Bras-dpungs.
13. Gilt copper statuette of Buddha Śākyamuni seated in the attitude of "touching the earth."
14. Brass statuette of Padma-sambhava, the apostle of Tibet, seated between two standing figurines.
15. Brass statuette of a Buddha seated in the "protecting" attitude.
16. Gilt copper statuette of a Bōdhisattva.
17. Brass statuette of a Grand-Lama.
18. Gilt copper statuette of the Buddha Amitābha.
19. Wooden statuette of the goddess Tārā.
20. Cremation tablet of burnt clay, roughly trefoiled in shape with figurines of ten seated Buddhas and eight *mchod-rten* in relief.
21. Tibetan banner.

2.—LUCKNOW MUSEUM.†

1. Marble slab (18½" × 11") with inscription in Persian characters, 6 lines, from Firozpur, Muradabad District.
2. Three pieces of gold slightly hammered (Pre-Mauryan).
3. Ring edged on both sides with beading, diameter 9/16"; and separate from it two beads joined together. Gupta period.
4. One serpentine finger ring with six coils of flat gold band ribbed in middle terminating in *vaśra* ornament and wire which is twisted loosely round preceding coil. Mauryan period, diameter ¾".
5. Hollow bead, diameter ¼".
6. Flat wheel with axle and spokes. Diameter ½".
7. Bead in shape of double cone, hollow, length 11' 16"; fluted on one side.
8. Fragment of hollow bead.
9. Gold cylinder of thin plate decorated with four bands of ornament. Very finely executed. Length ¾".
10. Two fragments of gold leaves.
11. Six inscribed copper-plates, measuring each 2' 3" × 1' 4" to 1' 5", with three rings and one seal of Chandradēva of Kanyakubja (Kanauj). They form two separate documents, one dated *Samvat* 1150 and the other 1156 and both record grants by Chandradēva.
12. Five gold rings from Muttra.

* All these objects have been given on loan by the Director-General of Archaeology in India.

† Nos. 2-10 were excavated by Mr. J. H. Marshall at Bhita near Allahabad, No. 11 presented by the District Officer, Benares, and No. 12 presented by the Magistrate of Muttra.

3.—MATHURA (MUTTRA) MUSEUM.*

1. Four Gandhāra sculptures presented by the Director-General of Archaeology in India.
2. Eighteen old brass articles.
3. Female image from Saptarshi Tila presented by the Punjab Government.
4. Broken railing pillar from Farah.
5. Female figure, on reverse mason mark.
6. Two architectural stones, one with two human heads and the other with two lions' heads. Length 2' and 2' 7½". From Devi Attos.
7. Two Buddhist statuettes seated (ht. 10" and 8") from Muttra City.
8. Stele with two panels (ht. 3' 6½"). From the vicinity of Gurgaon.
9. Image of Gaṇeśa dancing (ht. 16"). From Gurgaon.
10. Seated Buddhist image, headless, Kushān period (ht. 8"). From Gurgaon.
11. Standing Bōdhisattva, headless, Kushān period (ht. 2' 9"). From Gurgaon.
12. Standing Nāga, headless, Kushān period (ht. 2' 8"). From Gurgaon.
13. Standing female figure, headless (ht. 2' 1"). From Gurgaon.
14. Fragment of Jain (?) sculpture (ht. 8"). From Gurgaon.
15. Slab with standing figure of Brahmā (?) (ht. 2' 1"). From Gurgaon.
16. Gaṇeśa and eight Saktis (ht. 1' 10"). From Gurgaon.
17. Small fragment of door-jamb (ht. 8½"). From Gurgaon.
18. Lower fragment of door-jamb (ht. 1' 6"). From Gurgaon.
19. Sculpture of Brahmā and Viṣṇu (?), seated (ht. 1'). From Gurgaon.
20. Defaced sculpture (ht. 1' 3"). From Gurgaon.
21. Seated Viṣṇu statuette (ht. 1' 10"). From Palwal, Gurgaon district.
22. Fragment of railing pillar with female figure holding censer (ht. 1' 4½"). From Salempur, Muttra tahsil.
23. Five heads from Javahar village. From Iglās, Aligarh district.
24. Three brass groups of worshipping Rājā and Rānī, each inscribed in Nāgarī. From various villages in Muttra district.
25. Brass bowl inscribed in Persian. From Brindāban.
26. Brass lamp inscribed in Persian. From Muttra City.
27. Inscribed sculpture of Nāga and two Nāgīs (ht. 4' 3"). From Bhadār village, 5½ miles east of Muttra City.
28. Standing statue of King Kānishka inscribed (ht. 5' 4"). From village of Māt.
29. Inscribed torso of Kushān prince (ht. 4' 5"). From the village of Māt.
30. Inscribed statue of Kushān king seated on throne (ht. 6' 10"). From Māt.
31. Lower half of Bōdhisattva (?) standing with lion carved on back (ht. 3' 8"). From Māt.
32. Inscribed *sati* slab, with Rājput horseman and female figure (ht. 4' 4"). From Sona village, Sadar tahsil, Muttra district.
33. Three heads, one Buddhist, colossal size and two apparently Brahmanical. From Bhalesar site near Muttra.
34. Lower half of terra-cotta figure of Pārvati, seated on lion, with infant Kartikeya (ht. 8"). From Gosna site.
35. Three terra-cottas. From Sītālā Maṭ, Muttra City.
36. Brass *huqah* (hookah).
37. Fragmentary sculpture of Lakshmi and Kubēra (ht. 6"). From Jatanka Nagla between Baroda and Achnéra.
38. Two brass groups of Rājā and Rānī, each with Nāgarī inscription.
39. Lower portion of slab with indistinct carving (ht. 3½"). From field near Achnéra.
40. Buddha head, more than life-size (ht. 15"). From Varahi mound outside Brindāban gate, near Chāmuṇḍā Maṭ, Muttra City.
41. Fragment of miniature Persepolitan capital with male and female heads (ht. 4½"). From Abalya Ganj site on Brindāban Road.
42. Two more fragments from same site.

* For the above list I am indebted to Pandit Radha Krishna, Honorary Assistant Curator, through whose agency all the sculptures and inscriptions enumerated here were acquired.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab,
in the P. W. D., B. & R. Branch, No. 1119-G. S., dated 26th
August 1913.

READ.—

Progress Report of the Superintendent, Hindu and Buddhist Monuments, Northern Circle,
for the year ending 31st March 1912.

Remarks.—The most important work in the Punjab is the commencement of systematic explorations at the site of Taxila near Serai Kala, Rawalpindi district, which was undertaken in February last. The work is likely to last for some years, and the results promise to be most interesting and valuable. No mention has been made of these explorations in this report, as the Director-General of Archaeology intends to deal with them in his Annual Report. The expenditure of Rs. 1,011-5-6 on Hindu and Buddhist Monuments in the Punjab is for repairs only.

The important work of cataloguing the coins in the Lahore Museum, which was commenced last year by Mr. Whitehead, I. C. S., and the preparation of the Catalogue of the Gandhara Sculptures by Mr. Hargreaves has been gone on with, but not completed.

Order.—Ordered, that a copy of the report and of the above remarks be submitted to the Government of India, in the Home Department, and that copies of the same be distributed to the Chief Secretary to Government, Punjab, the Director-General of Archaeology in India, the Superintendent, Archaeological Survey, Muhammadan and British Monuments, the Superintendent, Archaeological Survey, Hindu and Buddhist Monuments, Commissioners, Deputy, Commissioners, Superintending and Executive Engineers and Officers, and Institutes named in the list circulated with Government of India, Home Department letter No. 298, dated 23rd July 1910.

By order of the Hon'ble the Lieutenant-Governor.

R. S. MACLAGAN, COLONEL,
Secretary to Government, Punjab, P. W. D.,
Buildings and Roads Branch.

ANNUAL PROGRESS REPORT.

PART I.

DEPARTMENTAL NOTES.

From the commencement of the year under review, and until the 28th of September 1912, Dr. Vogel held charge of this office.

Touring.

Of that period 162 days were spent in camp and 19 days at headquarters. The editing of the Annual Reports of the Archaeological Survey, the preparation of the Progress Report of this circle and other publications occupied him from April 22nd to September 25th, 1912, which period was spent in Simla. Leaving for Muttra on the 26th September he visited the ancient site of Mat and, on the forenoon of the 29th of September, made over charge to me and proceeded to Europe on combined leave for one year and six months.

Since taking over charge 77 days have been spent in touring and 107 days at headquarters. Before leaving Muttra the Museum and a number of ancient sites in the neighbourhood were inspected and estampages and photographs taken of certain inscriptions and sculptures recently acquired for the Museum. On the 25th of October I proceeded to Delhi to meet the Director-General of Archaeology and returned to Lahore on the 28th October. The preliminary arrangements for the acquisition of the land required for the excavation of Taxila necessitated my visiting that site on November 7th and again on December 21st, when the actual area to be excavated was marked out and the necessary plan prepared. A short tour in the United Provinces occupied me from the 16th to 26th of January during which period I inspected the Asoka pillars at Delhi, the ancient sites of Jalesar, Noh Khas and Noh Khera in the Etah District, the Muttra Museum, the ancient brick temple of Tinduli in the Fatehpur District and the Archaeological remains and museum at Sarnath, visiting, on my return, the Provincial Museum at Lucknow. I proceeded on February 4th, 1913, to Serai Kala in the Rawalpindi District in order to take over the land acquired by the Director General of Archaeology for the excavation of the Taxila site and under his direction commenced the exploration of the Sir Kap mound, Dr. Marshall himself arriving and taking over the work on the 4th of March after which date, until the end of the year, I remained to assist him.

After bringing to completion the excavations at Kasia Pandit Hirananda

Assistant Surveyor.

examined the sculptures discovered by the Public Works Department at Gorakhpur and also their find spot and furnished the Director General of Archaeology with a report on them. He also inspected the sculptures of the Sun Deity now in charge of the Police at Gorakhpur, as well as those lying at the dak bungalow at the same place. The sculptures belong to the mediaeval period and Pandit Hirananda recommends that the latter collection at least should be removed to the Provincial Museum, Lucknow.

After drafting the report of his work while in charge of this office he proceeded to Kangra with the object of finishing the list of ancient monuments in that district the compilation of which had been entrusted to him. To this work and the preparation of his article on the Kasia excavations he devoted the greater part of the hot weather. He has completed the listing of the monuments of Kalu, Mandi and Sukhet, but in Kangra proper a few monuments still remain to be surveyed. During September he toured in the tract known as Guler and secured some valuable material for the local history of that region, including a manuscript history of the Rajas of Haripur written some 200 years ago. This he is arranging to publish with a translation and notes in English. While in the Kangra District he surveyed the interesting groups of rock-cut temples at Masrur, the only known specimens in the Punjab, and drew up a note on them

for the Director General of Archæology. On the 21st of October he proceeded on privilege leave for three months, but was recalled to duty on the 21st of December, 1912, owing to his transfer to the United Provinces, the Local Government desiring that he should join his appointment as Curator of the Provincial Museum, Lucknow, at an early date.

2. In the year under report Rs. 1,011-5-6 were expended on the preservation of Hindu and Buddhist Monuments under my charge in the Punjab and Rs. 12,960-4-1 in the United Provinces. This is due principally to the greater abundance of pre-Moslem remains in the Gangetic plain but the want of a complete list of monuments in the Punjab, and particularly the absence of detailed conservation notes on those already listed, render it impossible to expend on Hindu and Buddhist Monuments in the Punjab sums which may be available for that purpose. The heaviest expenditure was incurred in the case of the Dhamak Stupa at Sarnath. I found on inspection in January, 1913, that the repairs to the ancient brick temple at Tinduli in the Fatehpur District referred to in last year's report had not been completed. The District Engineer, however, now reports that the measures advocated by Dr. Vogel have been carried out in their entirety. In the Punjab works on Hindu and Buddhist Monuments were limited to annual repairs.

3. Only one monument has been brought under the operations of the Ancient Monuments Preservation Act of 1904 during the year under review, namely, the gateway in front of the temple of Malot in the Jhelum District, but the acquisition or proclamation of certain sites in the United Provinces is receiving the consideration of that Government.

4. As will be seen above the Assistant Surveyor has completed the listing of the Monuments of Kulu, Mandi and Sukhet and of most of those of Kangra proper. The hope expressed in the previous report that these might be sent to the press has not been realized, for Pandit Hirananda took three months' privilege leave and was then transferred to the United Provinces. The manuscripts are now being typed and edited and, though every endeavour will be made to hasten their issue, their publication is likely to be delayed. Particular attention will be devoted to the listing of monuments, during the next touring season and arrangements have been made to devote not less than three months to this work and a beginning will be made in the Rawalpindi Division.

5. For the first time since the formation of this circle systematic explorations were carried out in the Punjab and this at the Taxila site in the Rawalpindi District under the direction and control of the Director-General of Archæology. The work is likely to extend over a long period, the progress and results of which will be dealt with by that officer. In the United Provinces Rai Bahadur Pandit Radha Krishna completed the excavation of the Mat site near Muttra an account of which will be published by Dr. Vogel in the Annual Report of the Archæological Survey for 1911-12, while Pandit Hirananda brought to a successful close the exploration of the Kasia site.

6. No epigraphical material has come under consideration during the year under review.

7. Mr. R. B. Whitehead, I. C. S., is still occupied in cataloguing the coins of the Lahore Museum and I, myself, was engaged from January 3rd, 1912, to July 3rd, 1912, in the preparations of the catalogue of the Gandhara sculptures. Six months proved all too short for that work, for the confusion due to repeated renumbering of the exhibits considerably lengthened my task. All the monuments have at last been numbered particular care being taken that all published sculptures retain their original numbers by which further confusion will be avoided. During my presence at headquarters I have devoted as much time as possible to the completion of the catalogue, but at least three months' continuous work will be necessary for its accomplishment.

The Muthura (Muttra) Museum still receives the untiring attention of Rai Bahadur Pandit Radha Krishna, who has now been appointed as Honorary Curator. The recent acquisitions, a list of which is given in the appendix, are entirely the result of his labours.

The valuable collection of exhibits brought together on the occasion of the Delhi Durbar by the efforts of Mr. J. P. Thompson, I. C. S., and Mr. Gordon Sanderson of the Archaeological Survey has now been dispersed, but there is being prepared by the Archaeological Department an illustrated catalogue based on the scholarly contributions of these officers which will form a permanent record of that unique collection of Indian antiquities.

The services of Pandit Daya Ram, Sahni, having been lent to the Kashmir Durbar the completion of the catalogue of the Provincial Museum, Lucknow, now devolves upon his successor Pandit Hirananda.

The catalogue of the Archaeological Museum, Sarnath, prepared by Pandit Daya Ram, Sahni, is now in the press.

8. Dr. Vogel, Pandit Hirananda and I contributed various articles to the Annual Report of the Archaeological Survey, a complete list of which is given in Appendix (H).

Publications.

9. Books to the value of Rs. 49-15-11 have been procured for the office library, the cost being met from the ordinary budget allotment. A list of acquisitions will be found in Appendix (B).

Library.

10. Dr. Vogel having been granted combined leave for one year and six months made over charge of this office to me at Muttra on the 29th of September 1912.

Personnel.

Pandit Hirananda, Assistant Surveyor, was allowed privilege leave for three months, from 21st October 1912, but was recalled to duty on the forenoon of December 21st, 1912, his services having been transferred to the Government of the United Provinces. During his absence the clerk officiated for him, a temporary clerk on Rs. 30 per mensem being employed to act for the latter.

The Photographer was granted privilege leave for two months and five days, from 10th May to 14th July, 1912, the second draftsman replacing him, a temporary draftsman on Rs. 30 per mensem being engaged in his stead.

During the first half of the year the head draftsman was employed in completing the drawings of the tomb of Rukn-i-Alam at Multan and the preparation of designs for the Nirvana Stupa at Kasia, while the second draftsman was deputed to assist Rai Bahadur Pandit Radha Krishna at the Mat excavations and to prepare the drawings and photographs connected with that exploration. The arrears of unfinished drawings occupied the remainder of their time. Six original drawings were prepared as recorded in Appendix (F). Six tracings of designs for the proposed restoration or protection of monuments at Kasia and Sarnath were submitted to the Government of the United Provinces, and one of the area to be acquired under the Land Acquisition Act for excavation at Taxila to the Government of the Punjab. The photographs taken during the year number 194, the prints prepared 850. The photographer and the two draftsmen were also present at the Taxila excavations.

11. The month of April will be devoted to the monuments of the Almora District and June to the preparation of the Annual Progress Report of this Circle. The remainder of the hot weather will be spent in Simla on the routine work of the office and on the collation of the various list of monuments in the Punjab submitted by the District officers and in other literary work. The inspection of the rock-cut temples of Masrur and other monuments in the Kangra District and in the United Provinces will occupy the months of September and October, while November and December will be spent at headquarters. The remaining three months will be devoted to the listing of the monuments of the Rawalpindi Division and the preparation of conservation notes.

Programme for the next year.

PART II.

PRESERVATION OF MONUMENTS.

1. *Brick Temple at Tinduli.*—When I inspected the monument in January 1913, I found that the plinth only had been repaired. The Divisional Officer now reports that the work has been completed, and that the temple is in good repair. The cella has been cleaned and the broken stone lintel at the back

supported by a neat brick arch and the image of the four-armed Vishnu replaced. The porch and façade have been dismantled and rebuilt with bricks of the original type, the new work being as inconspicuous as possible. The platform has been bricked to prevent percolation and injury to the foundation. The monument will again be inspected in October next.

2. *Temple of Basheshar Mahadeo, Bajaura, Kangra District.*—A sum of Rs. 353 was sanctioned for repairs to this monument, but only Rs. 152 have been expended during the year under review. The fissures in the façade had increased but steps have been taken to prevent further displacement. The surrounding area has been cleared of vegetation and proper arrangements made for the draining of the site. The work is still in progress.

EXPLORATION.

(a)—*Explorations in the Mathura (Muttra) District.*—*Mat.* Under the direction of Dr. Vogel Rai Bahadur Pandit Radha Krishna conducted further operations in the Mathura District. The Mat site, which last year yielded the Kanishka statue and other images of the Kushan period, disclosed, on further exploration, only fragmentary remains of buildings which appear to be portions of a rectangular plinth measuring 100 feet by 59 feet. Of the building which once stood on this platform not a trace is left. At the east, or more correctly south-east, are the remains of a brick ramp evidently belonging to a flight of stairs which gave access to the plinth. There can be little doubt, however, but that the now lost building, which arose from this plinth, was the temple, *devakula*, mentioned in the two inscriptions found on the site.

At some distance from the supposed plinth are remnants of masonry foundations marking in all probability a rectangular enclosure which may have contained rows of dwelling rooms.

As the statue of Kanishka, together with the lower half of divine image and inscribed pedestal were found to the south of the supposed temple site, it may be conjectured that they occupied originally some subsidiary shrine or chapel. The lower half of the colossal statue of a Kushan king seated on his throne referred to in the last report was found on this site, but Pundit Radha Krishna was fortunate enough to recover the upper portion on the bank of a neighbouring tank, where it was being worshipped as Baran, i.e., *Varuna*, the god of the waters. This tank was partially excavated and found to be constructed of large bricks of exactly the same size as those used in the supposed temple plinth so that in all probability this tank is no other than the *pushkarani* mentioned in inscription on the seated figure as having been constructed at the same time as the temple. In excavating the tank some Naga images were discovered. Dr. Vogel notices that one of these, which is four-armed, holds in one of the left hands a plough, a fact particularly interesting, as this is one of the attributes of Baladeva or Balarama, the elder brother of Krishna, to whose close connection with Naga worship he has already directed attention (1).

(b)—*Jaisinghpura.* The Jaisinghpura site, some three miles from Mathura in the direction of Brindaban, a mound marking the site of an ancient Buddhist sanctuary, yielded a number of fragments of Buddha images of the Kushan period and some elaborate haloes of the Gupta period, as well as a clay tablet or sealing such as are commonly met with on Buddhist sites, but which is the first specimen to come to light at Mathura. The centre shows a miniature Buddha figure seated in the earth-touching attitude, *bhumisparsa-mudra*. Of the usual attendant figures only one to the proper right is still preserved. The lower portion of the seal area shows three miniature figures such as are found on representations of the Buddha's enlightenment. In one of these may be recognized the earth-goddess. Between these figures and the Buddha figure runs an inscription but the *aksharas*, which appear to be Brahmi of the Gupta period, are so small as to be indecipherable.

(c)—*Katra.*—Continued exploration of the Katra site failed to reveal the procession path and the dedicatory inscription relating to the Kushan king Vasushka (2) but at a higher level was found a straight causeway of large rough sandstone blocks laid three by three in a double layer and bound together by iron clamps, but this cannot be earlier than the 12th century. The remains

1. A. S. K. 1908-09, pp. 159 ff.

2. Cf. Annual Progress Report of the Archaeological Survey, Circle N. W.-P. and Oudh for the year ending June 30th, 1896, pp. ff.

of a brick stupa of about the 6th century and numerous sculptured fragments apparently decorative details of the Kesab Dev temple destroyed by Aurangzeb were, however, recovered, as well as an inscribed four-fold Jaina image. The images and inscriptions will be dealt with in detail by Dr. Vogel in his contribution to the Annual Report of the Archæological Survey. (Appendix H).

Excavations at Taxila.—The exploration of Sir Kap and the Chir Tope (Shapur Stupa) at the Taxila site in the Rawalpindi District being carried out under the immediate control of Dr. J. H. Marshall, C.I.E., Director General of Archaeology, will be dealt with in detail by that officer.

4	320	Ditto ...	Pushkarini. Plan of excavation	"
5	321	Muttra City ...	Katra. Plan of excavation	1/100
PUNJAB.				
6	322	Taxila, Rawalpindi District.	Site plan of Sūkapa Mound	1/1980

Besides these drawings seven tracings were prepared in ink and colour and drawings Nos. 303 to 305, 307 to 316 were completed during the year.

APPENDIX G.

List of acquisitions for Museums during the year 1912-13.

1.—LAHORE MUSEUM.

1. One copper coin of the Seythian Kings of India.
2. One copper coin of Jalal-ud-din Feroz II found in the Lower Bari Doab Jungle.
3. One papier mâché image of Sakyāmunī (?) seated in the attitude of touching the earth, ht. 18½".
4. One papier mâché image of Sakyāmunī (?) seated on a lotus in the attitude of touching the earth, ht. 12".
5. One clay image of Manjusri (?) seated on a lotus in the attitude of preaching the law. Head broken, ht. 13¼".
6. One clay image of Manjusri (?) seated on a lotus in the attitude of preaching the law, ht. 12½".
7. One papier mâché image of the goddess Tara seated on a lotus in the gift bestowing attitude. Head dress broken, ht. 13¾".
8. One clay figure of Avalokitesvara standing on a lotus. It is eight armed, and must originally have been eleven headed. Top broken. Inscription Buddhist creed in raised Lontse characters. Long oval halo, ht. 7¼".
9. Two clay figures of Sakyāmunī (?) seated in the attitude of touching the earth. Head missing, ht. 3¾" and 4¼".
10. One detached head similar to No. 5.
11. One cremation tablet of clay with figure of Lama seated on the lotus in the preaching attitude. Attendant standing on either side, ht. 3¼".
12. One cremation tablet of clay with figure of Lama seated on the lotus in the preaching attitude. Attendant standing on either side painted, ht. 2⅞".
13. One ornamental copper back piece of image with five figures of deities.
14. One copper front piece of image throne with thunderbolt in centre between two seated figures, ht. 5" length 16".
15. Copper fragment of image throne with two emblems, ht. 4", length 8.
16. Gilded wooden top of back piece of image throne with figures of winged Garuda and two Nagas, each with a hood of six snake heads. Eight miniature Buddha figures arranged along the circular border, ht. 10¼".
17. Two wooden side pieces of image throne each with leogryph rampant on lion and male attendant. Proper left side piece broken, ht. 18¼".
18. One miniature wooden thunderbolt. Length 4¼".

2.—LUCKNOW MUSEUM.

1. A terra-cotta tablet (3⅝" × 4½") damaged at the sides. It represents a human pair in amorous attitude with feet resting on a foot stool. The back ground has floral ornamentation and the chair is shown in perspective. Mauryan period. From Kosam, District Allahabad.
2. Stone image of Buddha with inscription of Kumar-Gupta. From village Deoria, District Allahabad. See Fleet C. I. I., pp. 45 ff.
3. Headless colossal image of Buddha standing (8' 8" high) with Maitreya between the feet. Kushana period.
4. Colossal statue of a standing Jaina Tirthankara (11' 8" by 4' 10"). Feet and right hand missing. Kushana period.
5. Jaina column broken at top (9' 5") adorned with Jaina figures. Cir. 1000 A.D.
6. Pediment of sandstone with a sunk medallion representing the head of Siva (3 by 4' 2"). Medieval period.
7. Jaina tirthankara, probably Rashabhanatha (ht. 3' 8") seated on a cushion placed on lion throne. Medieval period.
8. Fourteen boxes containing finds from Kasia, District Gorakhpur.
9. A collection of nails used for joining wooden planks. From Kachchi Kuti, Sabeth-Maheth, Districts Gonda-Babraich.
10. Gilt copper image of Buddha at the time of enlightenment (ht. 6½").
11. Gilt image of Tara, holding lotus stalk in the left hand (ht. 6½").
12. *Dor je* (Sanskrit *Vajra*) or thunderbolt (ht. 4½").
13. Stupa with square base (2⅝").
14. Fragments of brass (?) bell 2⅞" in diameter.

15. Stone image of Varaha or the boar incarnation of Vishnu elaborately carved with figures of different deities. Cir. 12th Century A. D. From Bania ki Barat, Dudhai, Lalitpur Sub-Division, District Jhansi.
16. Brazen image of Indra on elephant (ht. 1'-11 $\frac{3}{8}$ ").
17. Brazen figure of a demon, Tibetan *Yi-dam* with several heads and countless arms and legs (ht. 1'-9").
18. *Dor je* (Vajra) with the figures of a she-devil (Tibetan *To-wo*) above (7 $\frac{1}{8}$)".
19. Brass image (ht. 1'-11 $\frac{1}{4}$ ") of Avalokitesvara, eight armed and standing between two dragons supporting a miniature temple which rests on an ornamental pedestal.
20. Metal image (ht. 10 $\frac{7}{8}$ ") of Suparavanatha, a Jaina tirthankara sitting cross legged in meditation in a miniature temple with several Jaina figures around.

Note.—Nos. 3 to 7 were lying in Public Library at Allahabad and their provenance is unknown. Probably from Muttra.

Nos. 10 to 14 were found at Sahoth (ancient Jetavana).

Nos. 10 to 20 were purchased at Lucknow but their provenance is unknown.

3.—MUTTRA MUSEUM.

1. Standing Vishnu image, ht. 1'-4". Kankali Tila, Muttra.
2. Lower half of a standing Bodhisattva statue, ht. 1'-10". Kankali Tila Muttra.
3. Sculpture (architectural) ht. 2'. Sapaw village, Muttra District.
4. Sculpture (architectural) ht. 2'-3". Sapaw village, Muttra District.
5. Sculpture (architectural) ht. 7". Midhavli village, Muttra District.
6. Sculpture (architectural) ht. 9" Midhavli village, Muttra District.
7. Sculpture (architectural) ht. 6". Midhavli village, Muttra District.
8. Sculpture (architectural) 1'-2". Brahmandaght Mahaban.
9. Sculpture (architectural) ht. 7". Brahmandaghat at Mahaban.
10. Sculpture (architectural) ht. 9" Brahmandaghat Mahaban.
11. Nagri inscription found built into a wall, ht. 7".
12. Miniature sikhara shrine, ht. 4'. Daulatta village, Muttra District.
13. Vishnu image, ht 1'. Daulatta village, Muttra District.
14. Tirthankara image, ht. 3" Bundi Anandi village, Mahaban, District Muttra.
15. Relief, Varaha avatar, ht. 2'-2". Muttra.
16. Detached head, ht. 11" Muttra.
17. Dancing Ganesha, ht. 1'-9". Muttra.
18. Yaksha image, ht. 1'-3". Muttra.
19. Kubera image ht. 7" Lohaban.
20. Brass elephant, ht. 7".
21. Reclining Vishnu image, ht. 1'-4. Muttra.
22. Vishnu image, ht. 1'-5".
23. Railing with nude figure, ht. 2'. Mahaban, Muttra.
24. Jain sculpture, ht. 1'-2". Mahaban.
25. Head of figure supporting inscribed bowl, ht. 1'-9". Muttra.
26. to 29. Four miscellaneous sculptures, ht. 1', 1', 10, and 19" from Muttra.
30. Head, ht. 1'.
31. Architectural stone carved on both sides, ht. 10" from Barsana.
32. Fragment of railing, ht. 1'-6". Mat.
33. Inscribed Jain Tirthankara, ht. 1'-9". Katra, Muttra.
34. Surya image, ht. 1'-6". Kankali Tila, Muttra.
35. Inscribed pedestal, ht. 5". Muttra.
36. Fragment of head of a figure, ht. 1. Muttra.
37. Inscribed pedestal, ht. 5". Katra, Muttra.
38. Brass Buddha, ht. 7".
39. Brass Bodhisattva, ht. 10".
40. Brass Bodhisattva, ht. 4".
41. Inscribed pedestal, ht. 9". Bhutesvar, Muttra.
42. Bust of female statue, ht. 1'-5". Bhutesvar, Muttra.

43. Inscribed sculpture, ht. 1'-8". Mahaban, District Muttra.
44. Architectural fragment ht. 2'-1". Mahaban Agra road, Muttra.
45. Architectural fragment, ht. 1'-6". Mahaban, Muttra District.
- 46 to 49. Four sculptures, ht. 7", 8", 8", 9", Muttra District.
- 50 to 53. Four sculptures, ht. 1'-4", 2'-2", 2'-3", 1'-3", Muttra District.
54. Architectural fragment, ht. 1', from Mahaban.
55. Buddha figure, ht. 1'.
56. Inscribed sculpture, ht. 10" Rajkhera, Agra District.
57. Two sculptured pillars each, ht. 7'-5" Goras Dhanna, Aligarh District.
58. Sculptured pillar, ht. 6'-11" Goras Dhanna, Aligarh District.
59. Lion capital, ht. 7'-2" Goras Dhanna, Aligarh District.
60. Lion capital, ht. 1'-2" Goras Dhanna, Aligarh District.
61. Sculptured lintel, ht. 1'-1" Goras Dhanna, Aligarh District.
62. Standing Bodhisattva (complete), ht. 1'-10" Vihar, District Farrukhabad.
63. Carved wooden box presented by Pandit Kshtrapal Sharma, ht. 5".
64. Inscribed architectural fragment, ht. 1'-1". Find place a ruined *baghichi* in the 2nd mile on the Muttra-Delhi road.
